Answer: C,D,FExplanation:Catalyst 6500 switches running Cisco IOS software support the macro command switchport host. The switchport host macro command was designed to facilitate the configuration of switch ports that connect to end stations. Entering this command sets the switch port mode to access, enables spanning tree PortFast, and disables channel grouping, all at the same time. The switchport host macro command can be used as an alternative to the switchport mode access command.Reference:
