NEW QUESTION: 1A customer built a VDI on a VNX array. The customer currently has only NL-SAS drives. The customer wants to simulate I/O characteristics of users accessing the storage from the virtual desktops. What tool should be recommended?**A.** Virtual Storage Integrator**B.** Unisphere Analyzer**C.** Test Harness Planner**D.** Horizon View Planner**Answer: D**

NEW QUESTION: 2You have been hired by a contractor, who wants you to manage a construction project for one of their clients. The project team has been working for two months, and is 35% done with the job. Two of your team members come to you with a conflict about how to handle the ongoing maintenance for a piece of equipment. You know that they can safely ignore the problem for a while, and you're concerned that if your project falls behind schedule before next week's stakeholder meeting, it will cause problems in the future. You tell the two team members that the problem really isn't as bad as they think it is, and if they take a few days to cool off about it you'll help them with a solution. This approach to conflict resolution is known as:**A.** Smoothing**B.** Forcing**C.** Withdrawal**D.** Compromise**Answer: A**
Explanation:Smoothing is minimizing the problem, and it can help cool people off while you figure out how to solve it. But it's only a temporary x, and does not really address the root cause of the conflict.

NEW QUESTION: 3An organization posts project costs to the balance sheet as they are incurred. Each month they recognize project revenue on each project.
