If you obtain a certification with the help of our JN0-281 actual test questions you can get a good position in many countries.

NEW QUESTION: 1You want to display the value of a shell variable called service after assigning a value as shown:SERVICE =ACCT SWhich two settings will display the name of the variable and its value?**A.** env | grep SERVICE**B.** set \$SERVICE**C.** env \$SERVICE**D.** echo \$SERVICE**E.** set | grep service**Answer: A,D****Explanation:**C: env - set the environment for command invocation If no utility operand is specified, the resulting environment shall be written to the standard output,with one name= value pair per line.

NEW QUESTION: 2You have a System Center 2012 R2 Virtual Machine Manager (VMM) infrastructure that manages five Hyper-V hosts. The Hyper-V hosts are not clustered.You have a virtual machine template that deploys a base image of Windows Server 2012 R2. No role services or features are enabled in the base image.You need to deploy a virtual machine named VM1 that is based on the virtual machine template.VM1 will be deployed as part of a service. VM1 must have the Web Server (IIS) server role installed. The solution must not require modifications to the virtual machine template or the base image.What are two possible profile types that achieve the goal? Each correct answer presents a complete solution.**A.** Hardware**B.** Physical Computer**C.** Application**D.** Capability**E.** Guest OS**Answer: D,E**

NEW QUESTION: 3You suspect malicious behavior by one of your console session users. Which of the following methods could be used so that you will be notified whenever the suspect user is logged in? The method should not tip off the suspect user or affect overall system integrity or performance to a noticeable degree.**A.** Pipe the btmp file to a filter and launch a notification script if the user logs on.**B.** Modify the user's login script to inform you of his presence and then exec itself with the real shell.**C.** Insert into the suspect user's profile a script to notify you.**D.** Configure syslogd to pipe all auth log messages to a script which checks for the suspect user and then notifies you via email.**Answer: D****Explanation:**Syslogd (the system log daemon) can be configured via the syslog.conf file.This file specifies where log entries should be written. You can configure syslogd to send authentication log messages to a script which checks for the suspect user and then notifies you via email.**Incorrect Answers**A:The btmp file is used to record failed logon attempts. This won't work because the user is able to log on successfully. B:Inserting a script into the users profile file won't work because the user may notice the script if he/she looks at the profile file.D:Modifying the users login script won't work because the user may notice the modification if he/she looks at the script.

NEW QUESTION: 4A system administrator is setting up a file transfer server. The goal is to encrypt the user authenticationand the files the user is sending using only a user ID and a key pair. Which of the following methods wouldachieve this goal?**A.** AES**B.** IPsec**C.** PGPD. SSH

Answer: D Explanation: Section: Cryptography Explanation/Reference: Explanation: With SSH you can use automatically generated public-private key pairs to encrypt a network connection, and then use password authentication to log on. Or you can use a manually generated public-private keypair to perform the authentication, allowing users or programs to log in without having to specify a password.
