NEW QUESTION: 1What is an end-user productivity issue that could indicate an opportunity for HP DaaS?
A. a high proportion of mobile employees who need to be monitored to ensure they are on the job
B. a need for end-user training to enhance Microsoft Office application skills
C. device reliability issues from an aging device fleet that cause end-user downtime
D. poor access to timely information
Answer: D

NEW QUESTION: 2You are designing an access policy for the sales department at your company. Occasionally, the developers at the company must stop, start, and restart Azure virtual machines. The development team changes often. You need to recommend a solution to provide the developers with the required access to the virtual machines. The solution must meet the following requirements:
* Provide permissions only when needed.
* Use the principle of least privilege.
* Minimize costs.
What should you include in the recommendation? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.
Answer: Explanation:

NEW QUESTION: 3Which of the following refers to the collection of policies and procedures for implementing controls capable of restricting access to computer software and data files?
A. Logical access control
B. Physical access control
C. None of the choices.
D. Component access control
E. Binary access control
F. System-level access control
Answer: A
Explanation/Reference: Explanation: Logical access control is about the use of a collection of policies, procedures, and controls to restrict access to computer software and data files. Such control system should provide reasonable assurance that an organization's objectives are being properly achieved securely and reliably.
