**NEW QUESTION: 1A. Option DB. Option AC. Option CD. Option B Answer: C**

**NEW QUESTION: 2**You are asked to build an adaptive design into an MAF application. The requirement is to show a multipage wizard for an MAF application functionality when the application runs on a smartphone and a single page layout for the same functionality when the application runs on a tablet. Which two options allow you to implement this use case?**A.** Selecting the Enable Adaptive Design check box in the maf-application.xml file visual editor allows you to configure constraints on the application level that, upon application start, tell the framework which MAF Features to load when the application is started on a smartphone and which Features to load when the application is started on a tablet.**B.** A Feature LifecycleListener class can be created and configured to load AMX content upon application start. In this case, Java, using the AdfmfContainerUtilities framework helper class, determines the type of device to be smartphone tablet and switches the content.**C.** Two MAF Features can be created, one for the single page view and the other for the multipage wizard. Constraints defined on the feature configuration conditionally switch between the two options.**D.** A Feature can have multiple contents (AMX pages, AMX Task Flow, and so on). A content constraint can be defined on the first content to hide when the application runs on a smartphone and to show when it runs on a tablet. This way, the first content configured for a Feature holds the single page layout, whereas the second (with no constraints defined) has the multipage wizard function.**Answer: A,B**

#### NEW QUESTION: 4

顧客は、自分のデータがすべてAWS上で安全であるかどうかについて問い合わせ、特にElastic Map Reduce (EMR) について心配しています。

AWSに備えられているいくつかのセキュリティ機能について彼に通知する必要があります。

EMRまたはS3に関して間違っているのはどれですか？ **A.** Amazon

S3は、保存されたデータが不正アクセスから保護されていることを確認するための認証メカニズムを提供します。 **B.**

AWSネットワークで送信されるすべてのパケットはインターネットプロトコルセキュリティ (IPsec) を使用しています。 **C.** Amazon

EMRのお客様は、安全な送信のためにHTTPSプロトコルを使用してAmazon

S3にデータを送信することを選択できます。 **D.** お客様は入力データをAmazon

S3にアップロードする前に暗号化することができます。 **Answer: B** Explanation: Amazon S3

provides authentication mechanisms to ensure that stored data is secured against unauthorized access. Unless the customer who is uploading the data specifies otherwise, only that customer can access the data. Amazon EMR customers can also choose to send data to Amazon S3 using the HTTPS protocol for secure transmission. In addition, Amazon EMR always uses HTTPS to send data between Amazon S3 and Amazon EC2. For added security, customers may encrypt the input data before they upload it to Amazon S3 (using any common data compression tool); they then need to add a decryption step to the beginning of their cluster when Amazon EMR fetches the data from Amazon S3. IPsec is a protocol suite for securing Internet Protocol (IP) communications by authenticating and encrypting each IP packet of a data stream. Amazon supports Internet Protocol security (IPsec) VPN connections, but does not protect all data packets at this level. Reference:
