C-HCMP-2311 PDF version is printable and you can print them into hard one, and take some notes on them, C-HCMP-2311 Real Exam Questions with ONE Year Free Update, Our C-HCMP-2311 preparation exam is compiled specially for it with all contents like exam questions and answers from the real C-HCMP-2311 exam.

NEW QUESTION: 1You need to set up the Permutation Feature Importance module according to the model training requirements.Which properties should you select? To answer, select the appropriate options in the answer area.NOTE: Each correct selection is worth one point.

Answer: Explanation:Explanation:Box 1: AccuracyScenario: You want to configure hyperparameters in the model learning process to speed the learning phase by using hyperparameters. In addition, this configuration should cancel the lowest performing runs at each evaluation interval, thereby directing effort and resources towards models that are more likely to be successful.Box 2: R-Squared

NEW QUESTION: 2Refer to the exhibit.The calendar shows the level backup that was taken on each day. Which data is sent to the backup server on Friday's backup?**A.** All changes since Monday**B.** All changes since Wednesday**C.** All changes since Thursday**D.** All changes since Tuesday**Answer: D**

NEW QUESTION: 3Which tasks can you perform with the data provisioning view in the SAP HANA studio?(Choose two)**A.** Suspend replication of tables**B.** Filter replicated data**C.** Start replication of tables**D.** Apply data transformations**Answer: A,C**

NEW QUESTION: 4Activity A has a duration of three days and begins on the morning of Monday the 4th. The successor activity, B, has a finish-to-start relationship with A.The finish-to-start relationship has three days of lag, and activity B has a duration of four days. Sunday is a non workday. Such data can help to determine _____**A.** Calendar time between the start of A to the finish of B is 14 days**B.** The total duration of both activities is 8 days**C.** The finish date of B is Wednesday the 13th**D.** Calendar time between the start of A to the finish of B is 11 days

Answer: DExplanation:Explanation/Reference:Explanation:The duration of A, which is three, is added to the duration of B, which is four, for a total of seven. The three days between the activities is lag and not duration. The lag is a constraint and must be taken into account as part of the network calculations, but it does not consume resources. The total time by the calendar is 11 days as counted from the morning of Monday the 4th. The lag occurs over Thursday, Friday, and Saturday.Sunday is a non workday, so activity B does not start until Monday the 11th. Therefore, the calendar time is 11 days, and activity B ends on Thursday the 14th.
