NEW QUESTION: 1 Which mode is used when certain hosts are located on the same network as a sensor and other hosts enter through a router or VPN? **A.** Mixed **B.** Enforcement **C.** Prevention **D.** Hybrid **Answer: A**

NEW QUESTION: 2 If specific information comes to an auditor's attention that implies the existence of possible illegal acts that could have a material, but indirect effect on the financial statements, the auditor should next: **A.** Seek the advice of an informed expert qualified to practice law as to possible contingent liabilities. **B.** Report the matter to an appropriate level of management at least one level above those involved. **C.** Discuss the evidence with those charged with governance. **D.** Apply audit procedures specifically directed to ascertaining whether an illegal act has occurred. **Answer: D** Explanation: Explanation/Reference: Explanation: Choice "A" is correct. If specific information comes to an auditor's attention that implies the existence of possible illegal acts that could have a material, but indirect effect on the financial statements, the auditor should next apply audit procedures specifically directed to ascertaining whether an illegal act has occurred. The auditor should obtain an understanding of the situation, inquire of management (at a level above those involved), consult legal counsel, and consider applying additional audit procedures if necessary. Choice "B" is incorrect. The auditor would consult with the client's legal counsel after obtaining an understanding of the situation and inquiring of management. Choice "C" is incorrect. The auditor would inquire of management at a level above those involved after obtaining an understanding of the situation. Choice "D" is incorrect. The auditor would only communicate with those charged with governance regarding detected illegal acts, not possible illegal acts.

NEW QUESTION: 3 Microsoft Active Directory integrated machines are not authenticating to the internal WLAN. The WLAN settings are WPA2-AES-802.1x and are authenticating to a Cisco Identity Services Engine server. You investigate and note that non-domain authenticated machines are properly authenticating to the WLAN using their Active Directory credentials. Why would this problem occur? **A.** The domain machines are configured to disable the wireless adapter. **B.** The ACS server is not joined to the domain, causing authentications to fail. **C.** The non-domain machines are using local accounts that are not authenticated through the domain. **D.** The WLAN is configured improperly in group policy. **Answer: D** Explanation: Explanation/Reference: Explanation:
