NEW QUESTION: 4 A company deploys Office 365 in a federated identity model. The environment has two Active Directory Domain Services (AD DS) servers and two Web Application Proxy servers that are not joined to the domain. All externally published applications that use Windows Authentication and are hosted on-premises must use Active Directory Federation Services (AD FS) to log on. You need to deploy pre-authentication on the Web Application Proxy (WAP) servers. What should you do first? **A.** Remove and reinstall the AD FS role. **D** Remove and reinstall the WAP role. **B.** Enable Kerberos constrained delegation. **C.** Join the WAP servers to the AD DS domain. **Answer: C** Explanation: ===== Topic 2, ProseWare Inc. Background ProseWare, Inc. is a software company that specializes in developing smartphone apps that work on multiple platforms. The main office for the company is located in Atlanta. The company has branch offices in Tokyo and Paris. The company recently published a new game. The game has sold over 10 million copies in the first year. In the same period, 25 million copies of the free version of the game were downloaded. ProseWare also developed a user productivity app named MyNotesPro. Employees Due to the massive demand for the game and for potential new versions and features, ProseWare plans to increase their staff from 100 to 1,000 employees. The employees will be evenly distributed between the three locations. Each employee will have a tablet device that runs Windows 10. ProseWare plans to connect all offices together by using high-speed internet links. Each employee will be issued a smartphone that runs Apple iOS, Android, or Windows 10. The quality assurance (QA) department includes 50 employees. Each QA department employee will be issued three smartphone devices, one device for each of the operating systems. ProseWare uses Microsoft Intune to manage devices. The company has joined the Apple Device Enrollment program. Current environment You create a virtual machine (VM) named RemApp1 in Microsoft Azure by using the Windows Server Remote Desktop Session Host gallery image. Users in the Training department connect to the VM and run several training apps. You have a file server named FILER01 that runs Windows Server 2012 R2. In Azure, you create a virtual network and a DNS record. You implement directory synchronization between the on-premises domain and Azure. You have purchased Remote Desktop Services Client Access Licenses. Business Requirements All employees will be given access to a suite of ProseWare premium apps that includes MyNotesPro. You must provide access to the apps by using Azure RemoteApp. The Atlanta corporate headquarters performs training on a weekly basis for all Tokyo and Paris employees. The training is conducted by using Microsoft Skype for Business on Windows 10 Enterprise devices. You configure the devices to display content in the respective language for the location. Some of the trainers in Atlanta speak Japanese or French. The Chief Technology Officer requires the following reports: Technical Requirements Employees must be able to download and install the appropriate RemoteApp client for their specific mobile device. The procedure for installing RemoteApp clients differs for each mobile operating system. All users must have access to the Azure RemoteApp infrastructure on their mobile devices in order to access the ProseWare premium apps. All apps must be centrally managed and updated. You must ensure that the apps are available to all employees. Employees must install all apps from a common source location. The ProseWare apps must only be installed on employee devices. You must import RemApp1 into the Azure RemoteApp Template Image Library. RemApp1 will host the ProseWare premium apps. Some of the apps must be able to access data kept in the on-premises servers at the Atlanta office. You must design a Work Folders solution on a FILER01. You have the following requirements: *You must encrypt all data that is synchronized. *You must synchronize settings every 60 minutes. *You must restrict the size of each file that is synchronized to 5 gigabytes.
