Our CCAK exam preparation materials are not the cheapest, but we are the highest cost-effective, accuracy materials to overcome our competitors.

NEW QUESTION: 1 A company has external vendors that must deliver files to the company. These vendors have cross-account that gives them permission to upload objects to one of the company's S3 buckets. What combination of steps must the vendor follow to successfully deliver a file to the company? Select 2 answers from the options given below Please select: **A.** Upload the file to the company's S3 bucket **B.** Encrypt the object with a KMS key controlled by the company. **C.** Add a bucket policy to the bucket that grants the bucket owner full permissions to the object **D.** Attach an IAM role to the bucket that grants the bucket owner full permissions to the object **E.** Add a grant to the objects ACL giving full permissions to bucket owner. **Answer: A, E** Explanation: This scenario is given in the AWS Documentation A bucket owner can enable other AWS accounts to upload objects. These objects are owned by the accounts that created them. The bucket owner does not own objects that were not created by the bucket owner. Therefore, for the bucket owner to grant access to these objects, the object owner must first grant permission to the bucket owner using an object ACL. The bucket owner can then delegate those permissions via a bucket policy. In this example, the bucket owner delegates permission to users in its own account. Option A and D are invalid because bucket ACL's are used to give grants to bucket Option C is not required since encryption is not part of the requirement For more information on this scenario please see the below Link: <https://docs.aws.amazon.com/AmazonS3/latest/dev/example-walkthroughs-managing-access-example3.html> The correct answers are: Add a grant to the objects ACL giving full permissions to bucket owner., Upload the file to the company's S3 bucket Submit your Feedback/Queries to our Experts

NEW QUESTION: 2 Which of the following statements are true regarding proxy authorization? (Choose 2) **A.** set proxy is only permitted at one level **B.** set proxy can be executed within a transaction **C.** set proxy within a procedure retains the identity of the proxy when you exit **D.** proxy authorization is granted by the System Administrator **E.** set proxy can be executed in a database with a guest user **Answer: A, E**

NEW QUESTION: 3 An organization wants to offer an on-screen survey immediately after an online (WBT) course is completed. How can they achieve this? **A.** Create or import the course and map an assessment instance to that course with the post-test option selected. **B.** Add survey questions inside a LearnCenter course. **C.** Use the built in SurveyMonkey integration to push the survey after the course has been completed. **D.** Email the assessment instance when

the course is completed.**Answer: C**

NEW QUESTION: 4HOTSPOT You have a file server named Server1 that runs Windows Server 2012. Server1 contains a folder named Folder1. A user named User1 is a member of Group1 and Group2.
