To answer, drag the appropriate namespace to the correct office in the answer area. Each namespace may be used once, more than once, or not at all. Additionally, you may need to drag the split bar between panes or scroll to view content. **Answer:** Explanation: Topic 4, A. Datum Corporation Overview A). Datum Corporation is an airline catering company that has 8,000 users. A). Datum has three main offices. The offices are located in Detroit, Chicago, and New York. Existing Environment Active Directory Environment The network contains an Active Directory forest named adatum.com. The forest contains a single domain. All domain

controllers run Windows Server 2012. Each main office contains two domain controllers. Each office is configured as an Active Directory site. The functional level of the forest is Windows Server 2012. Network Infrastructure The offices connect to each other by using a dedicated WAN link. Only the office in New York and the office in Detroit connect directly to the Internet. Each office has a firewall. The public DNS records for A). Datum are configured as shown in the following table. The external interface for the firewall in the New York office is configured to use an IP address of 131.107.1.200 and to pass inbound traffic on port 25 and port 443 to EX2. The external interface for the firewall in the Detroit office is configured to use an IP address of 131.107.2.200 and to pass inbound traffic on port 443 to EX4. The Active Directory site is configured as shown in the Sites exhibit. (Click the Exhibit button.) Exchange Server Organization A). Datum has an Exchange Server 2013 organization that contains two servers. The servers are configured as shown in the following table. Each server contains 15 mailbox databases. Users use the name mail.adatum.com to connect to their mailbox from the Internet. The users use the FQDN of the servers to connect from the internal network. AM of the users in the Detroit office have a mailbox hosted on EX2. The default email address policy contains a single email address format of @adatum.com. A separate Send connector exists for the Chicago office and the New York office. The local servers in each office are the only source servers in each Send connector. The New York office is configured as a hub site. Antimalware filtering is disabled on EX1 and EX2. Problem Statements A). Datum identifies the following issues: - Users in the Detroit office report that sometimes, Microsoft Outlook takes a long time to open. - During a recent storage failure, administrators failed to restore the latest backup and lost all of the email messages from the previous 48 hours. - Users report that the email messages sent to some Internet domains are not received. Users in the Chicago office report that some of their email messages generate a non-delivery report (NDR). - The help desk in the New York office reports that its most common Exchange-related task is to restore email messages that were deleted by users more than 14 days ago. The task requires time-consuming restore operations by the help desk. Requirements Business Requirements A). Datum wants to provide users with the ability to access their email from Internet Explorer 10, even when the users are disconnected from the network. This ability must only be available if the users log on to Outlook Web Access by using the Private option. Planned Changes You plan to deploy three additional Exchange Server 2013 servers. The servers will be configured as shown in the following table. After the planned deployment, all of the mailboxes of the Detroit office users will be moved to EX3. All of the Detroit office users will use the name detroitmail.adatum.com when they connect from the Internet and the name ex4.adatum.com when they connect from the internal network. Technical Requirements A). Datum identifies the following technical requirements: - All existing and future mailboxes must be limited to 5 GB of storage. Antimalware and anti-spam filtering must be enabled for the entire Exchange Server organization. If storage for the mailbox database fails, administrators must be able to recover email messages handled by transport services for to the last five days. Only the members of a group named Executives must be able to schedule meetings in a room mailbox named Boardroom. Meeting requests must not be moderated. All of the servers in the New York office that have the Client Access server role installed must be accessed by using a load balancing solution that can mark a server as down if a specific URL on the server is unavailable. - Mailbox Creation Requirements A). Datum identifies the following requirements for creating new mailboxes: - All mailboxes must automatically have single item recovery enabled. All mailboxes must automatically have the Exchange ActiveSync feature disabled.
