As far as we know, our IAM-Certificate exam prep have inspired millions of exam candidates to pursuit their dreams and motivated them to learn more high-efficiently.

**NEW QUESTION: 1**What is the minimum battery life of an Aruba battery-powered beacon?**A.** 6 months**B.** 1 month**C.** 4 years**D.** 1 year**Answer: C**Explanation:Explanation/Reference:Reference: [http://www.arubanetworks.com/assets/ds/DS\\_LocationServices.pdf](http://www.arubanetworks.com/assets/ds/DS_LocationServices.pdf)

**NEW QUESTION: 2****A.** Shadow**B.** Wbadmin**C.** Diskshadow**D.** Diskpart**Answer: C**Explanation: DiskShadow.exe is a tool that exposes the functionality offered by the Volume Shadow Copy Service (VSS).The diskshadow command delete shadows deletes shadow copies.

**NEW QUESTION: 3**Whenever a hedge fund is added to the database, its historical data is also posted to the database.Usually, only favorable results of the fund are published in the database. This leads to:**A.** Survivorship bias.**B.** Instant history bias.**C.** Selection bias.**Answer: B**Explanation:This leads to an incorrect or inflated presentation of the performance of the fund during their incubation period, leading to the "backfill bias" or the "instant history bias".

**NEW QUESTION: 4****A.** Option A**B.** Option D**C.** Option B**D.** Option C**Answer: A**Explanation: Support for little endian mode in the POWER8 processor enables a new generation of applications. While I plan to devote future blog entries to this topic, let me take a moment to address some basic facts about the technology. First, the traditional POWER operating systems (AIX, and IBM i) are big endian and will continue to run as such on POWER8 and future systems. Second, Linux operating systems over time will be migrating from being big endian to little

endian in an organized way that by no means compromises the support cycles for their existing releases. Third, as little endian operating systems come to market, a new little endian application ecosystem will grow. Given that most applications today support one or more little endian operating systems (Windows or x86 Linux) and at least one big endian operating system (Linux on Power, AIX, or z/OS), this ecosystem should grow quickly. Finally, little endian mode on POWER8 is not a magic bullet: compiled x86 Linux applications will still require a recompile at a minimum because the x86 and Power instruction set architectures are still different. With this new support, Power will simplify on step in the porting process for new applications, but to develop the whole ecosystem will take time. Reference:
