NEW QUESTION: 1Your company has a main office and four branch offices. The main office is located in London. The network contains an Active Directory domain named contoso.com. The network is configured as shown in the exhibit. (Click the Exhibit button.) Each office contains several servers that run Windows Server 2012. In each branch office, you plan to deploy an additional 20 servers that will run Windows Server 2012. Some of the servers will have a Server Core installation of Windows Server 2012. You identify the following requirements for the deployment of the new servers: Operating system images must be administered centrally. The operating system images must be deployed by using PXE. The WAN traffic caused by the deployment of each operating system must be minimized. You need to recommend a solution for the deployment of the new servers. What should you recommend? Exhibits
A. Deploy Windows Deployment Services (WDS) in each office. Replicate the images by using Distributed File System (DFS) Replication.
B. Deploy Windows Deployment Services (WDS) in the main office only. Copy the images by using BranchCache.
C. Deploy Windows Deployment Services (WDS) in each office. Copy the images by using BranchCache.
D. Deploy Windows Deployment Services (WDS) in the main office only. Replicate the images by using Distributed File System (DFS) Replication.

NEW QUESTION: 3 Which two operations can be completed in calculation manager? (Choose two.)
A. View and kill requests
B. Delete a reporting application
C. Create planning applications
D. Restructure a planning application

Answer: A, D
Explanation: Explanation/Reference:
Explanation:A: The Sessions window lists active user sessions and requests for the server, application, or database. A user can have more than one session open at any given time. For example, one user may have open sessions on two databases. If you have Administrator or Application Manager permissions, you can end all requests, end all requests for a user, or end a specific request.
C: To restructure a database:
1. From the System View, click the Database Properties icon.
2. In the Enterprise View, expand the Oracle Hyperion Planning application type, the application, and the plan type whose database you want to restructure.
3. Right-click the plan type, and select Restructure Database.
4. Confirm whether you want to restructure the database
