NEW QUESTION: 2 Your network contains an Active Directory domain named contoso.com. The physical topology of the network is configured as shown in the exhibit. Each office contains 500 employees. You plan to deploy several domain controllers to each office. You need to recommend a site topology for the planned deployment. What should you include in the recommendation? More than one answer choice may achieve the goal. Select the BEST answer. Exhibit **A.** Three sites and three site links **B.** One site **C.** Five sites and three site links **D.** Five sites and one site link **Answer: A** Explanation: Explanation/Reference: Explanation: Create a site for each LAN, or set of LANs, that are connected by a high speed backbone, and assign the site a name. Connectivity within the site must be reliable and always available. Washington, Atlanta and Boston are all connected by high-speed links so they can be one site. This site will have default one site link. New York and Sydney will be separate sites. Each will have a site link to the Washington/Atlanta/Boston site.

NEW QUESTION: 3 You have a virtual network named VNet1 that has the configuration shown in the following exhibit. Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic. NOTE: Each correct selection is worth one point. **Answer:** Explanation: Box 1: add an address space Your IaaS virtual machines (VMs) and PaaS role instances in a virtual network automatically receive a private IP address from a range that you specify, based on the address space of the subnet they are connected to. We need to add the 192.168.1.0/24 address space. Box 2: add a network interface The 10.2.1.0/24 network exists. We need to add a network interface.
