NEW QUESTION: 1 Refer to the exhibit. Which statement about this output is true? **A.** The user logged in and was given privilege level 15. **B.** The login failed because the password entered was incorrect. **C.** The login failed because there was no default enable password. **D.** The user logged into the router with the incorrect username and password. **Answer: B**
Explanation: http://www.cisco.com/en/US/docs/ios/12_2/debug/command/reference/dbfaaa.html debug aaa authentication To display information on AAA/Terminal Access Controller Access Control System Plus (TACACS+) authentication, use the debug aaa authentication privileged EXEC command. To disable debugging command, use the no form of the command. debug aaa authenticationno debug aaa authenticationThe following is sample output from the debug aaa authentication command. A single EXEC login that uses the "default" method list and the first method, TACACS+, is displayed. The TACACS+ server sends a GETUSER request to prompt for the username and then a GETPASS request to prompt for the password, and finally a PASS response to indicate a successful login. The number 50996740 is the session ID, which is unique for each authentication. Use this ID number to distinguish between different authentications if several are occurring concurrently.

NEW QUESTION: 3 It is important on all projects to determine when and how human resources will be met. Assume that you are managing a project to assess methods for streamlining the regulatory approval process for new medical devices in your government agency. Because the agency has undergone downsizing during the past three years, subject matter experts are in short supply. You must determine whether the needed subject matter experts can be acquired

from inside the agency or whether you must use contractors. This information should be documented in the _____
A. Staffing management plan
B. Contracts management plan
C. Make-or-buy decisions in the procurement management plan
D. Resource management plan
Answer: A
Explanation: Explanation/Reference: Explanation: The staffing management plan is part of the human resource management plan. One section of it involves staff acquisition. Among other things, this section includes whether the human resources will come from within the organization or from external, contracted sources. These data then help to plan the acquisition of project team members.

NEW QUESTION: 4 Your company has a testing environment that contains an Active Directory domain named contoso.com. The domain contains a server named Server1 that runs Windows Server 2016. Server1 has IP Address Management (IPAM) installed. IPAM has the following configuration. The IPAM Overview page from Server Manager is shown in the IPAM Overview exhibit. (Click the Exhibit button.) The group policy configurations are shown in the GPO exhibit. (Click the Exhibit button.) For each of the following statements, select Yes if the statement is true. Otherwise, select No.
Answer: Explanation: Explanation No domains have been selected in the "Configure Server Discovery" option. Therefore, no automatic discovery will take place. Manual addition of a server will also fail because IPAM needs a domain configured for server verification.
