Answer: A,DExplanation:Using the ORDER BY ClauseThe order of rows that are returned in a query result is undefined. The ORDER BY clause can be used to sort the rows. However, if you use the ORDER BY clause, it must be the last clause of theSQL statement. Further, you can specify an expression, an alias, or a column position as the sortcondition.SyntaxSELECT expr FROM table[WHERE condition(s)][ORDER BY {column, expr, numeric_position} [ASC|DESC]];In the syntax:ORDER BY specifies the order in which the retrieved rows are displayedASC orders the rows in ascending order (This is the default order.)DESC orders the rows in descending orderIf the ORDER BY clause is not used, the sort order is undefined, and the Oracle server may notfetch rows in the same order for the same query twice. Use the ORDER BY clause to display the rows in a specific order.Note: Use the keywords NULLS FIRST or NULLS LAST to specify whether returned rowscontaining null values should appear first or last in the ordering sequence.
