Stop guessing and begin learning with a classic professional in all things Ericsson ECP-206 practise tests, Our team is always available at the back-end, who immediately **ECP-206 Boot Camp** makes required changing soon as the vendor or companies makes some alteration.

NEW QUESTION: 1To abide by industry regulations, a Solutions Architect must design a solution that will store a company's critical data in multiple public AWS Regions, including in the United States, where the company's headquarters is located. The Solutions Architect is required to provide access to the data stored in AWS to the company's global WAN network. The Security team mandates that no traffic accessing this data should traverse the public internet. How should the Solutions Architect design a highly available solution that meets the requirements and is cost-effective?
A. Establish two AWS Direct Connect connections from the company headquarters to an AWS Region. Use the company WAN to send traffic over a DX connection. Use an AWS transit VPC solution to access data in other AWS Regions.
B. Establish two AWS Direct Connect connections from the company headquarters to an AWS Region. Use the company WAN to send traffic over a DX connection. Use inter-region VPC peering to access the data in other AWS Regions.
C. Establish AWS Direct Connect connections from the company headquarters to all AWS Regions in use. Use the company WAN to send traffic over to the headquarters and then to the respective DX connection to access the data.
D. Establish two AWS Direct Connect connections from the company headquarters to an AWS Region. Use the company WAN to send traffic over a DX connection. Use Direct Connect Gateway to access data in other AWS Regions.
Answer: D Explanation: This feature also allows you to connect to any of the participating VPCs from any Direct Connect location, further reducing your costs for making using AWS services on a cross-region basis.

<https://aws.amazon.com/blogs/aws/new-aws-direct-connect-gateway-inter-region-vpc-access/>
A: There is only a single DC and hence is not highly available. B: VPC peering means there are additional cost charges when data transfer between region. Also there is a 125 VPC peering limit. Data transferred across Inter-Region VPC Peering connections is charged at the standard inter-region data transfer rates. <https://aws.amazon.com/about-aws/whats-new/2017/11/announcing-support-for-inter-region-vpc-peering/> C: Similar to B. D:

Remember one caveat which the question did not state is if there are multiple accounts: The VPCs that reference a particular Direct Connect Gateway must have IP address ranges that do not overlap. Today, the VPCs must all be in the same AWS account; we plan to make this more

flexible in the future.
