NEW QUESTION: 1You have an on-premises Microsoft SharePoint Server 2016 environment. You create a Microsoft 365 tenant. You need to migrate some of the SharePoint sites to SharePoint Online. The solution must meet the following requirements: Microsoft OneDrive sites must redirect users to online content. Users must be able to follow both on-premises and cloud-based sites. Users must have a single SharePoint profile for both on-premises and on the cloud. When users search for a document by using keywords, the results must include online and on-premises results. From the SharePoint Hybrid Configuration Wizard, you select the following features: Hybrid business to business (B2B) sites Hybrid OneDrive Hybrid Search Which two requirements are met by using the SharePoint Hybrid Configuration Wizard features? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point. **A.** When users search for a document by using keywords, the results must include online and on-premises results. **B.** OneDrive sites must redirect users to online content. **C.** Users must have a single SharePoint profile for both on-premises and on the cloud. **D.** Users must be able to follow both on-premises and cloud-based sites. **Answer: A, B** Explanation: Hybrid OneDrive - Choosing this option will redirect on-premises My Sites/OneDrive for Business sites to SharePoint Online OneDrive for Business in Office 365. Once the wizard completes, any click of the OneDrive link from on-premises will redirect to OneDrive for Business in the cloud. This meets the following requirement: OneDrive sites must redirect users to online content. Cloud hybrid search - Choosing this option creates a cloud Search service application in SharePoint Server and connects the cloud Search service application to your Office 365 tenant. This meets the following requirement: When users search for a document by using keywords, the results must include online and on-premises results. NEW QUESTION: 2 Look at the following exhibit carefully. You can click the Voice Gateway for the BR2 location to see the output from the debug voice ccapi inout command and click on 10.1.5.10 to view and search the trace file output. You can also enter a string in the Search box and click the Find button to search the output. X can be clicked to back to the item. As a network technician, you have recently configured a trunk between the Cisco Unified CallManager cluster at 10.1.5.10 and a CME at a 10.3.130.1. However, in the testing of this configuration, you discover that you cannot complete any call when dialing from ext. 2020 to ext. 4001 or from ext. 4001 to ext. 2020. Please choose the most possible reason from the following statements. **A.** An incorrect CSS has been applied to the gateway at HQ. **B.** The CSS has been omitted from the trunk configured to BR2. **C.** The trunk IP address in the Cisco Unified CallManager information field is incorrect. **D.** A transaction rule has been applied that is keeping the call from being completed. **Answer: C**

NEW QUESTION: 3 Your company's support process has the following two business requirements: - New cases that are marked as high priority automatically move to an escalation stage when first opened. - New cases with no priority move to the research stage. What should

you configure to meet these business requirements?**A.** Two business process flows**B.** Real-time workflow process**C.** Branching business rules**D.** Branching business process flow**Answer: D**
Explanation:

NEW QUESTION: 4A user is collecting 1000 records per second.The user wants to send the data to CloudWatch using the custom namespace.Which of the below mentioned options is recommended for this activity?**A.** Send all the data values to CloudWatch in a single command by separating them with a comma.CloudWatch will parse automatically**B.** Create one csv file of all the data and send a single file to CloudWatch**C.** It is not possible to send all the data in one call.Thus, it should be sent one by one.CloudWatch will aggregate the data automatically**D.** Aggregate the data with statistics, such as Min, max, Average, Sum and Sample data and send the data to CloudWatch**Answer: D**
Explanation:AWS CloudWatch supports the custom metrics. The user can always capture the custom data and upload the data to CloudWatch using CLI or APIs. The user can publish data to CloudWatch as single data points or as an aggregated set of data points called a statistic set using the command put-metric-data. It is recommended that when the user is having multiple data points per minute, he should aggregate the data so that it will minimize the number of calls to put-metric- data. In this case it will be single call to CloudWatch instead of 1000 calls if the data is aggregated.
