If you have any questions, you can directly contact us **C-ACTIVATE22 Latest Test Dumps** through online live chat or you can notify us through email, we will give you reply as soon as we can.

NEW QUESTION: 1DRAG DROPDRAG DROPYou plan to deploy a cloud service named contosoapp. The service includes a web role named contosowebrole. The web role has an endpoint named restrictedEndpoint. You need to allow access to restricted Endpoint only from your office machine using the IP address 145.34.67.82. Which values should you use within the service configuration file? To answer, drag the appropriate value to the correct location in the service configuration file. Each value may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.**Answer:** Explanation: Explanation: * Rule with lower order are applied first. * We can selectively permit or deny network traffic (in the management portal or from PowerShell) for a virtual machine input endpoint by creating rules that specify "permit" or "deny". By default, when an endpoint is created, all traffic is permitted to the endpoint. So for that reason, it's important to understand how to create permit/deny rules and place them in the proper order of precedence to gain granular control over the network traffic that you choose to allow to reach the virtual machine endpoint. Note that at the instant you add one or more "permit" ranges, you are denying all other ranges by default. Moving forward from the first permit range, only packets from the permitted IP range will be able to communicate with the virtual machine endpoint.

NEW QUESTION: 2데이터 분석을 수행 할 때 개인 식별 정보 (PH)의 공개를 방지하기 위해 다음 중 어떤 보안 메커니즘을 사용해야 합니까?**A. 익명화****B. 암호화****C. 분할****D. 토큰 화****Answer: A**

NEW QUESTION: 3The descriptor liferay-display.xml:**A.** Defines the initial views for the portlet
B. All of the above**C.** Provides the ability to use Liferay's permission system**D.** Defines the categories in the Add Application menu
Answer: D
