NEW QUESTION: 3 Which of the following statements is not false?
A. A random variable is a function, which associates an outcome with a real number.
B. The color of a car cannot be a random variable because it is not a random number.
C. A random variable can take on specific values with certainty.
Answer: A
Explanation: A random variable can take on specific values but with uncertainty. The color of a car can be a random variable; each color considered is an outcome which can be associated to a probability (real number).
