NEW QUESTION: 2 You have an Azure subscription named Subscription1. Subscription1 contains a virtual machine named VM1. You install and configure a web server and a DNS server on VM1. VM1 has the effective network security rules shown in the following exhibit. Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic. NOTE: Each correct selection is worth one point.
Answer: B
Explanation: Explanation Box 1: Rule2 blocks ports 50-60, which includes port 53, the DNS port. Internet users can reach to the Web server, since it uses port 80. Box 2: If Rule2 is removed internet users can reach the DNS server as well. Note: Rules are processed in priority order, with lower numbers processed before higher numbers, because lower numbers have higher priority. Processing stops once traffic matches a rule, as a result, any rules that exist with lower priorities (higher numbers) that have the same attributes as rules with higher priorities are not processed. A. `<c:set var="resultMap" property="{results[0].name}" value="{results[0].score}" />`

C. `<c:set var="resultMap" property="{results[0].name}" value="{results[0].score}" />`

E. `<c:set target="{resultMap}" property="{results[0].name}" value="{results[0].score}" />`
