NEW QUESTION: 2 DRAG DROP Your network contains an Active Directory domain named contoso.com. The domain contains two member servers named Server1 and Server2. All servers run Windows Server 2012. You generalize Server2. You install the Windows Deployment Services (WDS) server role on Server1. You need to capture an image of Server2 on Server1. Which three actions should you perform? To answer, move the three appropriate actions from the list of actions to the answer area and arrange them in the correct order. Select and Place:
Answer: Explanation: Explanation: Box 1: Start Server2 by using PXE. Box 2: Add a capture image to Server1. Box 3: Add an install image to Server1. Note: * Capture images are Windows Preinstallation Environment (Windows PE) images that allow you to easily capture the install images that you prepare using Sysprep.exe. Instead of using complex command-line tools, once you have run Sysprep.exe on your reference computer, you can boot to the Windows Deployment Services client computer using PXE and select the capture image. When the capture image boots, it starts the Capture Image Wizard, which will guide you through the capture process and optionally upload the new install image to a Windows Deployment Services server. Steps/ create a capture image./ Create an install image./ Add the install image to the Windows Deployment Services server.
