Our service tenet is everything **Test C_HCMOD_05 Duration** for customers, namely all efforts to make customers satisfied.

NEW QUESTION: 1 Given the code fragment:List<String> codes = Arrays.asList (“DOC”, “MPEG”, “JPEG”);codes.forEach (c -> System.out.print(c + “ “));String fmt = codes.stream().filter (s-> s.contains (“PEG”)).reduce((s, t) -> s + t).get(); System.out.println(“n” + fmt);What is the result?DOC MPEG JPEG**A.** The order of the output is unpredictable.**B.** MPEGJPEG**C.** MPEGMPEGJPEGMPEGJPEG**D.** MPEGJPEGDOC MPEG MPEGJPEG
Answer: D

NEW QUESTION: 2 After working on his doctoral dissertation for two years, Joe, a user, is unable to open his dissertation file. The screen shows a warning that the dissertation file is corrupted because it is infected with a backdoor, and can only be recovered by upgrading the antivirus software from the free version to the commercial version. Which of the following types of malware is the laptop MOST likely infected with?**A.** Backdoor**B.** Trojan**C.** Armored virus**D.** Ransomware**Answer: D**Explanation:Ransomware is a type of malware which restricts access to the computer system that it infects, and demands a ransom paid to the creator(s) of the malware in order for the restriction to be removed. Some forms of ransomware encrypt files on the system's hard drive), while some may simply lock the system and display messages intended to coax the user into paying.Ransomware typically propagates as a trojan like a conventional computer worm, entering a system through, for example, a downloaded file or a vulnerability in a network service.The program will then run a payload: such as one that will begin to encrypt personal files on the hard drive. More sophisticated ransomware may hybrid-encrypt the victim's plaintext with a random symmetric key and a fixed public key. The malware author is the only party that knows the needed private decryption key. Some ransomware payloads do not use encryption. In these cases, the payload is simply an application designed to restrict interaction with the system, typically by setting the Windows Shell to itself, or even modifying the master boot record and/or partition table (which prevents

the operating system from booting at all until it is repaired) Ransomware payloads utilize elements of scareware to extort money from the system's user. The payload may, for example, display notices purportedly issued by companies or law enforcement agencies which falsely claim that the system had been used for illegal activities, or contains illegal content such as pornography and pirated software or media.Some ransomware payloads imitate Windows' product activation notices, falsely claiming that their computer's Windows installation is counterfeit or requires re-activation. These tactics coax the user into paying the malware's author to remove the ransomware, either by supplying a program which can decrypt the files, or by sending an unlock code that undoes the changes the payload has made.

NEW QUESTION: 3I would like to copy a database cluster directory for backup. Select two incorrect statements from below.**A.** A database cluster that has been restored can be used on a newer version of PostgreSQL.**B.** When using the Tablespace function, it is necessary to back up the directory that stores the tablespace as well.**C.** A database cluster that has been restored can be used on an older version of PostgreSQL.**D.** The directory must be copied after stopping the database server.**E.** A database cluster that has been restored can be used on a separate machine with the same structure.**Answer: A,C**

NEW QUESTION: 4 An attacker has installed a RAT on a host. The attacker wants to ensure that when a user attempts to go to"www.MyPersonalBank.com", that the user is directed to a phishing site.Which file does the attacker need to modify?**A.** Sudoers**B.** Hosts**C.** Networks**D.** Boot.ini**Answer: B**Explanation:Explanation/Reference:The hosts file is a computer file used by an operating system to map hostnames to IP addresses. The hosts file contains lines of text consisting of an IP address in the first text field followed by one or more host names. References: https://en.wikipedia.org/wiki/Hosts_(file)
