The network's subnet is 192.168.2.0/25. Which of the following are the MOST appropriate courses of action a security administrator could take to eliminate this risk? (Select TWO). **A.** Block port 25 on the firewall for all unauthorized mail servers. **B.** Disable open relay functionality. **C.** Shut down the SMTP service on the unauthorized mail server. **D.** Identify the origination point for malicious activity on the unauthorized mail server. **E.** Enable STARTTLS on the spam filter. **Answer: A,C** Explanation: Explanation In this question, we have an unauthorized mail server using the IP: 192.168.2.55. Blocking port 25 on the firewall for all unauthorized mail servers is a common and recommended security step. Port 25 should be open on the firewall to the IP addresses of the authorized email servers only (192.168.2.10 and 192.168.2.11). This will prevent unauthorized email servers sending email or receiving and relaying email. Email servers use SMTP (Simple Mail Transfer Protocol) to send email to other email servers. Shutting down the SMTP service on the unauthorized mail server is effectively disabling the mail server functionality of the unauthorized server.

NEW QUESTION: 4 You have a SharePoint Server 2010 server farm. You need to ensure that a user named User1 can manage all of the sites in a site collection. You must achieve this goal while preventing User1 from managing the SharePoint Recycle Bin. What should you do?
A. From Central Administration, configure the Web Application General Settings.
B. From Site Settings, configure the site permissions.
C. From Central Administration, configure the site collection administrators.
D. From Site Settings, configure the site collection administrators.
Answer: D
Explanation: Explanation/Reference: BURGOS MNEMO: Manage sites WITHOUT "Recycle Bin" = "Site Settings ... site collection administrators" @Kielowski
Explanation: I agree, B is the right answer. Why? If you take a domain user and make him Site Collection admin in Site Settings, he can log in and administer the site collection. He CANNOT log on to the CA and enable/disable the recycle bin. If you make him site collection admin through CA, he will be able to log on to the CA and manage the recycle bin at that level.
