The company wants to enhance user experiences and vendor integrations. The company plans to implement automated mobile ordering and delivery services.Best For You Organics hosts an Azure web app at the URL <https://www.bestforyouorganics.com>.Users can use the web app to browse restaurant locations, menu items, nutritional, information, and company information. The company developed and deployed a cross-platform mobile app.RequirementsYou must develop a chatbot by using the Bot Builder SDK and Language Understanding Intelligence Service (LUIS). The chatbot must allow users to order food for pickup or delivery.The chatbot must meet the following requirements:* Ensure that chatbot endpoint can be accessed only by the Bot Framework connector.* Use natural language processing and speech recognition so that users can interact with the chatbot by using text and voice. Processing must be server-based.* Alert users about promotions at local restaurants.* Enable users to place an order for delivery or pickup by using their voice.* Greet the user upon sign-in by displaying a graphical interface that contains action buttons.* The chatbot greeting interface must match the formatting of the following example:APIs must meet the following conditions:* API usage must not exceed 5,000 calls and 50,000 kilobytes of bandwidth per hour per vendor.* If a vendor is nearing the number of calls or bandwidth limit, the API must trigger email notifications to the vendor.* APIs must prevent API usage spikes on a per-subscription basis by limiting the call rate to 100 calls per minute.* The Inventory API must be written by using ASP.NET Core and Node.js.* The API must be updated to provide an interface to Azure SQL Database. Database objects must be managed by using code.* The Delivery API must be protected by using the OAuth 2.0 protocol with Azure Active Directory (Azure AD) when called from the Azure web app. You register the Delivery API and web app in Azure AD. You enable OAuth 2.0 in the web app.* The delivery API must update the Products table, the Vendor transactions table, and the Billing table in a single transaction. The Best For You Organics Company architecture team has created the following diagram depicting the expected deployments into Azure:Delivery APIThe Delivery API intermittently throws the following exception:Chatbot greetingThe chatbot's greeting does not show the user's name. NEW QUESTION: 4 Which of the following individuals performs various management roles within an administrative or functional area of the business, such as human resources, finance, accounting, or procurement?**A.** Functional manager**B.** Seller**C.** Operations manager**D.** Project manager**Answer: A**
Explanation: The role of a functional manager is to perform various management roles within an administrative or functional area of the business, such as human resources, finance, accounting, or procurement. He is assigned his own permanent staff to carry out the ongoing work. He should have a clear directive to manage all tasks within his functional area of responsibility. Answer option D is incorrect. A project manager is an expert in the field of project management. He is responsible for the entire project from inception to completion. The project manager leads the team and helps negotiate the multiple relationships within any project whether with clients, team members, firm principals or any variety of partners and functions as the hub of a project. Answer option A is incorrect. Seller is also known as a vendor, supplier or contractor. They are external company's elements that enter into a contractual agreement to provide components or services necessary for the project. Answer option B is incorrect. The role of operations manager is to perform various management roles in a core business area, such as research and development, design, manufacturing, provisioning, testing, or maintenance. The operations manager directly deals with constructing and maintaining the saleable products or services of the enterprise.
