NEW QUESTION: 1Which of the following should an information security manager establish to ensure security-related activities are adequately monitored?
A. Scheduled security assessments
B. Internal reporting channels
C. Accountability for security functions
D. Regular reviews of computer system logs
Answer: B

NEW QUESTION: 2You need to choose the appropriate data access technology for the children's book area of the web application. Which data access technology should you choose?
A. ADO.NET Entity Framework
B. Web Service
C. WCF Data Services
D. LINQ to SQL
Answer: D
Explanation:* Scenario: The children's book area of the web application must get data directly from a local database. It must use a connection string. It must also support access to the stored procedures on the database. Further, it is required to have strongly typed objects. Finally, it will require access to databases from multiple vendors and needs to support more than one-to-one mapping of database tables.* Microsoft Language Integrated Query (LINQ) offers developers a new way to query data using strongly-typed queries and strongly-typed results, common across a number of disparate data types including relational databases, .NET objects, and XML. By using strongly-typed queries and results, LINQ improves developer productivity with the benefitsof IntelliSense and compile-time error checking

However, the remote CE devices are not receiving the BGP routes.Referring to the exhibit, what is the problem?
A. The CE devices are detecting an AS loop
B. A VRF target community mismatch exists.
C. The PE devices are detecting an AS loop.
D. A route distinguisher mismatch exists.
Answer: A

NEW QUESTION: 4Arthur is interviewing candidates for a new position within his department. He will be working closely with the person he hires, so he prefers the interview to feel as comfortable as possible so the two can chat about the job and its requirements. His preferred interview method is to ask a few broad questions and to allow the candidate to answer the questions candidly, with his answers guiding the next questions that Arthur asks. In this situation, what type of interview technique is Arthur using?
A. Patterned
B. Nondirective
C. Directive
D. Behavioral
Answer: BExplanation:Explanation: A nondirective interview style occurs

when the interviewer asks broad questions to allow the candidate to answer candidly and comfortably. A behavioral interview would ask the candidate how he behaved in a past situation, with the intent being to use past experience to anticipate future actions. A patterned interview focuses on a group of questions that apply specifically to the job and what will be required in that position. A directive interview is highly focused and organized, with the interviewer asking the same questions of all candidates.
