**NEW QUESTION: 1** A small company's Chief Executive Officer (CEO) has asked its Chief Security Officer (CSO) to improve the company's security posture quickly with regard to targeted attacks. Which of the following should the CSO conduct FIRST?**A.** Conduct an internal audit against industry best practices to perform a qualitative analysis.**B.** Purchase multiple threat feeds to ensure diversity and implement blocks for malicious traffic.**C.** Deploy a UTM solution that receives frequent updates from a trusted industry vendor.**D.** Survey threat feeds from services inside the same industry.**Answer: D****Explanation:**ExplanationSecurity posture refers to the overall security plan from planning through to implementation and comprises technical and non-technical policies, procedures and controls to protect from both internal and external threats.From a security standpoint, one of the first questions that must be answered in improving the overall security posture of an organization is to identify where data resides. All the advances that were made by technology make this very difficult. The best way then to improve your company's security posture is to first survey threat feeds from services inside the same industry.

**NEW QUESTION: 4** You need your CI to build AMIs with code pre-installed on the images on every new code push. You need to do this as cheaply as possible. How do you do this?  
**A.** Purchase a Light Utilization Reserved Instance to save money on the continuous integration machine. Use these credits whenever you create AMIs on instances.  
**B.** Bid on spot instances just above the asking price as soon as new commits come in, perform all instance configuration and setup, then create an AMI based on the spot instance.  
**C.** Have the CI launch a new on-demand EC2 instance when new commits come in, perform all instance configuration and setup, then create an AMI based on the on-demand instance.  
**D.** When the CI instance receives commits, attach a new EBS volume to the CI machine. Perform all setup on this EBS volume so you don't need  
**Answer: B** Explanation: Amazon EC2 Spot instances allow you to bid on spare Amazon EC2 computing capacity. Since Spot instances are often available at a discount compared to On-Demand pricing, you can significantly reduce the cost of running your applications, grow your application's compute capacity and throughput for the same budget, and enable new types of cloud computing applications.
