**NEW QUESTION: 1** Which analytical list page do you use to display the difference between the net value and the committed quantity value?  
**A.** Monitor Scheduling Agreement Items  
**B.** Purchase Order Items Monitor  
**C.** Material Price Variance  
**D.** Monitor Supplier Confirmations

**Answer: D**

**NEW QUESTION: 2** Your program has a budget at completion of \$1,550,000 and is expected to last one year. Currently your program is 45 percent complete and has spent \$725,000. According to the program schedule you are actually to be fifty percent complete by this time, but due to some vendor delays your program is running just a bit late. Based on this information which is performing worse, the cost or schedule?  
**A.** The schedule is performing worse because the SPI is .90  
**B.** The cost is performing worse because the EAC is \$1,611,111.  
**C.** The cost is performing worse because the CPI is .96  
**D.** The schedule is performing worse because the SV is -\$27,500.  
**Answer: A**

**NEW QUESTION: 3** Although host-based and network-based IDSs perform similar functions and have similar capabilities, which of the following is an advantage of a network-based IDS over a host-based IDS, assuming all capabilities are equal?  
**A.** Network access  
**B.** External to system patching  
**C.** Segregated from host systems  
**D.** Scalability  
**Answer: C**  
**Explanation:** A network-based IDS has the advantage of being segregated from host systems, and as such, it would not be open to compromise in the same manner a host-based system would be. Although a network-based IDS would be external to system patching, this is not the best answer here because it is a minor concern compared to segregation due to possible host compromise. Scalability is also not the best answer because, although a network-based IDS does remove processing from the host system, it is not a primary security concern. Network access is not a consideration because both a host-based IDS and a network-based IDS would have access to network resources.

**NEW QUESTION: 4** Which is a benefit of effective risk management?  
**A.** Activity plans are agreed before the activity commences  
**B.** Staff members are better prepared to respond to incidents  
**C.** Guarantees business benefits will be delivered  
**D.** Removes the organization's need to take risks

**Answer: B**
