EAOA\_2024 online test engine enable you to review anytime anywhere, no matter on bus, in restaurant, or on bed, You won't get any telephone harassment or receiving junk E-mails after purchasing our EAOA\_2024 study guide.

And we make synchronization with official EAOA\_2024 to make sure our EAOA\_2024 certification data is the newest, Thus, you are not losing anything here and your investment is also secure.

Our Soft version of EAOA\_2024 practice materials combine knowledge with the latest technology to greatly stimulate your learning power, Trust us; your future will be bright with EAOA\_2024 certification.

This is the era of information technology where all kinds of information is flooded on the Internet (EAOA\_2024 study materials), making it much more difficult for those who prepare for [1z0-1071-23 Exam Bootcamp](#) the tests to get comprehensive understanding about the exam files they are going to choose.

Our EAOA\_2024 exam braindumps are set high standards for your experience, Instant download and simulation training, If you really want to pass exam one-shot our EAOA\_2024 study guide will be your best assistant.

High accuracy and high quality are the reasons why you should choose us.

**NEW QUESTION: 1**What are two capabilities of Data Loader? Choose two answers.**A.** Ability to export field history data**B.** Ability to extract organization and configuration data.**C.** Ability to prevent importing duplicate records.**D.** Ability to run one-time or scheduled data loads**Answer: A,D**

**NEW QUESTION: 2**Recent years have brought minority-owned businesses in the United States unprecedented opportunities—as well as new and significant risks. Civil rights activists have long argued that one of the principal reasons why Blacks, Hispanics and the other minority groups have difficulty establishing themselves in business is that they lack access to the sizable orders and subcontracts that are generated by large companies. Now congress, in apparent agreement, has required by law that businesses awarded federal contracts of more than \$500,000 do their best to find minority subcontractors and record their efforts to do so on forms filed with the government. Indeed, some federal and local agencies have gone so far as to set specific percentage goals for apportioning parts of public works contracts to minority enterprises. Corporate response appears to have been substantial. According to figures collected in 1977, the total of corporate contracts with minority business rose from \$77 to \$1.1 billion in 1977. The projected total of corporate contracts with minority business for the early 1980's is estimated to be over \$3 billion per year with no letup anticipated in the next decade. Promising as it is for minority businesses, this increased patronage poses dangers for them, too. First, minority firms risk expanding too fast and overextending themselves financially, since most are small concerns and, unlike large businesses they often need to make substantial investments in new plants, staff, equipment, and the like in order to perform work subcontracted to them. If, thereafter, their subcontracts are for some reason reduced, such firms can face potentially crippling fixed expenses. The world of corporate purchasing can be frustrating for small entrepreneurs who get requests for elaborate formal estimates and bids. Both consume valuable time and resources and a small company's efforts must soon result in orders, or both the morale and the financial health of the business will suffer. A second risk is that White-owned companies may seek to cash in on the increasing apportionment through formation of joint ventures with minority-owned concerns, of course, in many instances there are legitimate reasons for joint ventures; clearly, white and minority enterprises can team up to acquire business that neither could Third, a minority enterprise that secures the business of one large corporate customer often runs the danger of becoming and remaining dependent. Even in the best of circumstances, fierce competition from larger, more established companies makes it difficult for small concerns to broaden their customer bases; when such firms have nearly

guaranteed orders from a single corporate benefactor, they may truly have to struggle against complacency arising from their current success. The passage suggests that the failure of a large business to have its bids for subcontracts results quickly in order might cause it to **A.** face potentially crippling fixed expenses **B.** experience frustrations but not serious financial harm **C.** have to record its efforts on forms filed with the government **D.** revise its procedure for making bids for federal contracts and subcontracts **E.** increase its spending with minority subcontractors **Answer: B**

**NEW QUESTION: 3** You create a dashboard by using the Microsoft Power BI Service. The dashboard contains a card visual that shows total sales from the current year. You grant users access to the dashboard by using the viewer role on the workspace. A user wants to receive daily notifications of the number shown on the card visual. You need to automate the notifications. What should you do? **A.** Create a subscription. **B.** Tag the user in a comment. **C.** Share the dashboard to the user. **D.** Create a data alert. **Answer: D**

**Explanation:** Topic 1, Contoso Ltd, Case Study Overview This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided. To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study. At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section. To start the case study To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

**Existing Environment** Contoso, Ltd. is a manufacturing company that produces outdoor equipment. Contoso has quarterly board meetings for which financial analysts manually prepare Microsoft Excel reports, including profit and loss statements for each of the company's four business units, a company balance sheet, and net income projections for the next quarter.

**Data and Sources** Data for the reports comes from three sources. Detailed revenue, cost and expense data comes from an Azure SQL database. Summary balance sheet data comes from Microsoft Dynamics 365 Business Central. The balance sheet data is not related to the profit and loss results, other than they both relate to dates. Monthly revenue and expense projections for the next quarter come from a Microsoft SharePoint Online list. Quarterly projections relate to the profit and loss results by using the following shared dimensions: date, business unit, department, and product category.

**Net Income Projection Data** Net income projection data is stored in a SharePoint Online list named Projections in the format shown in the following table. Revenue projections are set at the monthly level and summed to show projections for the quarter.

**Balance Sheet Data** The balance sheet data is imported with final balances for each account per month in the format shown in the following table. There is always a row for each account for each month in the balance sheet data.

**Dynamics 365 Business Central Data** Business Central contains a product catalog that shows how products roll up to product categories, which roll up to business units. Revenue data is provided at the date and product level. Expense data is provided at the date and department level.

**Business Issues** Historically, it has taken two analysts a week to prepare the reports for the quarterly board meetings. Also, there is usually at least one issue each quarter where a value in a report is wrong because of a bad cell reference in an Excel formula. On occasion, there are conflicting results in the reports because the products and departments that roll up to each business unit are not defined

consistently. Planned Changes Contoso plans to automate and standardize the quarterly reporting process by using Microsoft Power BI. The company wants to how long it takes to populate reports to less than two days. The company wants to create common logic for business units, products, and departments to be used across all reports, including, but not limited, to the quarterly reporting for the board. Technical Requirements Contoso wants the reports and datasets refreshed with minimal manual effort The company wants to provide a single package of reports to the board that contains custom navigation and links to supplementary information. Maintenance, including manually updating data and access, must be minimized as much as possible. Security Requirements The reports must be made available to the board from powerbi.com. A mail-enabled security group will be used to share information with the board. The analysts responsible for each business unit must see all the data the board sees, except the profit and loss data, which must be restricted to only their business unit's data. The analysts must be able to build new reports from the dataset that contains the profit and loss data, but any reports that the analysts build must not be included in the quarterly reports for the board. The analysts must not be able to share the quarterly reports with anyone. Report Requirements You plan to relate the balance sheet to a standard date table in Power BI in a many-to-one relationship based on the last day of the month. At least one of the balance sheet reports in the quarterly reporting package must show the ending balances for the quarter, as well as for the previous quarter. Projections must contain a column named Revenue Projection that contains the revenue projection amounts. A relationship must be created from Projections to a table named Date that contains the columns shown in the following table. The relationships between products and departments to business units must be consistent across all reports. The board must be able to get the following information from the quarterly reports: \* Revenue trends over time \* Ending balances for each account \* A comparison of expenses versus projections by quarter \* Changes in long-term liabilities from the previous quarter \* A comparison of quarterly revenue versus the same quarter during the prior year

**NEW QUESTION: 4** Which three statements are true about Avaya Aura® Messaging (AAM)? (Choose three.) **A.** 20 Voice Ports are always reserved for retrieving messages. **B.** Each message application server allows for up to 100 simultaneous SIP or H323 sessions, with 300 active ports permitted per Voice Mail Domain (VMD). **C.** You can choose to use the Avaya Message Store or Microsoft Exchange Store. **D.** AAM can run on Avaya-provided hardware that runs Linux® and Avaya Aura® System Platform, or VMware in a virtualized environment. **E.** AAM Multi-Server configuration separates Application Servers from Avaya Message Store. **Answer: C,D,E**
