So you can choose our OGBA-101 study materials as your learning partner, it would become your best tool during your reviewing process, You just need to spend your spare time to practice the OGBA-101 valid dumps and the test will be easy for you if you remember the key points of OGBA-101 dumps latest skillfully.

**NEW QUESTION: 1**Baldwin Museum of ScienceYou need to recommend an access solution for the users in the sales department that meets the museum's technical requirements.What should you include in the recommendation?Case Study Title (Case Study): COMPANY OVERVIEW The Baldwin Museum of Science is an internationally renowned museum of science history. Physical LocationThe museum has a main office and a branch office named Branch1. The main office has 5,000 users. Branch1 has 1,000 users.The main office connects to Branch1 by using a WAN link. The WAN link is highly saturated.The museum has a sales department. All of the users in the sales department have client computers that run Windows XP Service Pack 3 (SP3). EXISTING ENVIRONMENT Active Directory EnvironmentThe network contains one Active Directory forest. The forest contains two domains named baldwinmuseumofscience.com and ad.baldwinmuseumofscience.com.All user accounts and computer accounts for all employees are in the ad.baldwinmuseumofscience.com domain. The organizational unit (OU) structure for ad.baldwinmuseumofscience.com is shown:Network InfrastructureThe network contains the following servers and Applications:Application servers that run either Windows Server 2003 Service Pack 2 (SP2), Windows Server 2008 SP2, or Windows Server 2008 R2.A custom Application named App1 that runs on all of the Application servers. App1 writes events to the Application log.A line-of-business Application named App2 that requires Internet Explorer 6. All of the users in the sales department run App2.File servers that run Windows Server 2008 R2. The main office has the following:A two-node failover cluster that runs Windows Server 2008 R2 and has the Hyper-V role installed and a Clustered Shared Volume. The failover cluster hosts

four virtual machines (VM) that run Windows Server 2008 R2. The VMs are stored on the Clustered Shared Volume. Each VM runs Microsoft SQL Server 2008. A server named Server1 that hosts two shared folders named Share1 and Share2. Share1 hosts 50,000 research documents that are shared by multiple users. Share2 hosts documents that are created by users in the sales department. Administration Model All users in Branch1 are members of global groups and universal groups. The groups are located in an OU named Groups in the ad.baldwinmuseumofscience.com domain.

**REQUIREMENTS**

**Planned Changes**

The Baldwin Museum of Science plans to implement a new branch office named Branch2. Branch2 will be configured as a separate Active Directory site. Branch2 will be configured to meet the following requirements:

- Minimize the cost of deploying new servers.
- Contain only client computers that run Windows 7.
- Connect to the main office by using a saturated WAN link.
- Contain only servers that run Windows Server 2008 R2. The servers will be configured as either file servers or Web servers. The file shares on the file servers must be available if a single file server fails.

In Branch2, if a single domain controller or a WAN link fails, users in the branch must be able to:

- Change their passwords.
- Log on to their client computers.

**Technical Requirements**

The Baldwin Museum of Science must meet the following technical requirements:

- Hardware and software costs must be minimized whenever possible.
- All VMs must be backed up twice a day.
- All VM backups must include the VM configuration information.
- Events generated by App1 must be stored in a central location.
- An administrator must be notified by e-mail when App1 generates an error.
- The number of permissions assigned to help desk technicians must be minimized.
- The help desk technicians must be able to reset the passwords and modify the membership of all users in Branch1.
- If a user overwrites another user's research document, the user must be able to recover a previous version of the document.
- When users in the sales department work remotely, they must be able to access the files in Share1 in the minimum amount of time.

**Security**

The Baldwin Museum of Science must meet the following security requirements:

- All scripts that run on production servers must be signed.
- Managers in Branch1 must be allowed to access the Internet at all times.
- Web site administrators must not be required to log on interactively to Web servers.
- Users in Branch1 must only be allowed to access the Internet between 12:00 and 13:00.
- Users and managers must be prevented from downloading executable files from the Internet.
- Administration of the corporate Web sites must support all bulk changes and scheduled content updates.

**A. Offline Files**  
**B. BranchCache in Distributed Cache mode**  
**C. Transparent caching**  
**D. BranchCache in Hosted Cache mode**

**Answer: A**

**Explanation:** Explanation/Reference: OFFLINE FILES Both Offline Files and Transparent Caching fulfill the technical requirement (When users in the sales department work remotely, they must be able to access the files in Share1 in the minimum amount of time). Transparent Caching is an enhanced version of Offline Files (available in Windows XP, Vista and 7), and only available in Windows 7. However, all sales computers are Windows XP SP3. By deploying the Offline Files technology, you allow network users to access files that are stored on network shares, even when the client computer is not connected to the network. A mobile user that accesses the share while disconnected from the network can still browse, read, and edit files because the files are cached on the client computer. You can initiate synchronization manually or set Synchronization Manager to control the synchronization of offline files with the network. [http://technet.microsoft.com/en-us/library/cc782388\(v=ws.10\).aspx](http://technet.microsoft.com/en-us/library/cc782388(v=ws.10).aspx)

**NEW QUESTION: 2** You have a customer that is building a new campus of four 3-story buildings that you have just completed the site survey for. The customer is interested in the amount of rack space they will need to allocate in either the building MDF or in the data center for controllers. Each building is going to require 75 APs to support voice and data. How should the controllers be deployed to provide the least number of controllers, the highest redundancy, and the easiest management?

- A.** Use the centralized deployment method in the data center with the N + 1 redundancy method.
- B.** Use the centralized deployment method in the data center with the N + N redundancy method.
- C.** Use the distributed deployment method in each building MDF with the N + N + 1 redundancy method.
- D.** Use the centralized deployment method

in the data center with the N + N + 1 redundancy method.**E.** Use the distributed deployment method in each building MDF with the N + 1 redundancy method.**F.** Use the distributed deployment method in each building MDF with the N + N redundancy method.**Answer: D**

**NEW QUESTION: 3A. 0B. 1C. 2D. 3E. 4Answer: A,B**

**NEW QUESTION: 4**Your company has a Microsoft 365 subscription that contains the users shown in the following table.You need to identify which users can perform the following administrative tasks:\* Modify the password protection policy.\* Create guest user accounts. Which users should you identify for each task? To answer, select the appropriate options in the answer area.**NOTE:** Each correct selection is worth one point.**Answer:** Explanation:Explanation Only a Global Admin can modify the password protection policy.A Global Admin or a user with the Guest Inviter role can create guest accounts.Reference: <https://docs.microsoft.com/en-us/azure/active-directory/authentication/howto-password-ban-bad-on-premises-op>
