NEW QUESTION: 3Which of the following statements is correct about SQLite?**A.** It can be accessed by other applications through ContentProvider.**B.** It is an object database.**C.** It is client-server format.**D.** It is possible to create and access a database by using SQLOpenHelper.**Answer: A****Explanation:**Explanation/Reference:Content providers are one of the primary building blocks of Android applications, providing content to applications. They encapsulate data and provide it to applications through the single ContentResolver interface. A content provider is only required if you need to share data between multiple applications. For example, the contacts data is used by multiple applications and must be stored in a content provider. If you don't need to share data amongst multiple applications you can use a database directly via SQLiteDatabase.References:
