NEW QUESTION: 2 Test objectives for systems testing of a safety critical system include completion of all outstanding defect correction. Regression testing is required following defect correction at all test levels. Which TWO of the following metrics would be MOST suitable for determining whether the test objective has been met? [K2]a. Regression tests run and passed in systems testingb. Incidents closed in systems testingc. Planned tests run and passed in system testingd. Planned tests run and passed at all levels of testinge. Incidents raised and closed at all levels of testing**A.** b and c**B.** a and e**C.** d and e**D.** a and b**Answer: B**

NEW QUESTION: 3 You are transporting an unconscious patient. How often should you check their vitals?**A.** 15 minutes**B.** 2-3 minutes**C.** 5 minutes**D.** 10 minutes**Answer: C**

NEW QUESTION: 4A. Option A**B.** Option B**C.** Option F**D.** Option E**E.** Option D**F.** Option C **Answer: D,E,F**Explanation:Just a draft:-Install the integration pack for SCSM on Orchstrator and configure the connection settings (SCSMserver name, User, Password)-Create a new runbook-First activity -> "Monitor Object" of SCSM integration pack -> Incident Class -> On Update -> Filter "Support Group" not equal "Tier 1"-Add 6 "Send Email" activities -> 6 different recipients -> add the text in each mail body-Link all 6 "Send Email" activities with the first "Monitor Object" activity-On each link delete the default rule "On success"-Add a new criteria -> Choose the "Support Group" from the data bus ->criteria of the first link "Support Group" equals "Tier 2"-Do the same with the other Links and Support Groups.-Check in and start the runbook
http://social.technet.microsoft.com/Forums/en/administration/thread/ea41a3a4-0b40-47ee-9ecca2ecab8794bfTo create an Orchestrator connectorIn the Service Manager console, click Administration.In the Administration pane, expand Administration, and then click Connectors. In the Tasks pane, under Connectors, click Create Connector, and then click Orchestrator

connector.Perform these steps to complete the Orchestrator Connector Wizard:On the Before You Begin page, click Next.On the General page, in the Name box, type a name for the new connector. Make sure that Enable thisconnector is selected, and then click Next.On the Connection page, in the Server Information area, type the URL of the Orchestrator Web service, depending on which version of Orchestrator you are using:For Orchestrator Beta, type the URL of the Orchestrator Web service in the form of http://<computer>:<port>/Orchestrator.svc, where <computer> is the name of the computer hosting the webservice and <port> is the port number where the web service is installed. (The default port number is 81.)For Orchestrator RC, type the URL of the Orchestrator Web service in the form of http://<computer>:<port>/Orchestrator2012/Orchestrator.svc, where <computer> is the name of the computer hosting the webservice and <port> is the port number where the web service is installed. (The default port number is 81.)On the Connection page, in the Credentials area, either select an existing account or click New, and thendo the following:In the Run As Account dialog box, in the Display name box, type a name for the Run As account. In theAccount list, select Windows Account. Enter the credentials for an account that has rights to connectOrchestrator, and then click OK. On the Connection page, click Test Connection.NoteSpecial characters (such as the ampersand [&]) in the User Name box are not supported.In the Test Connection dialog box, make sure that the message "The connection to the server wassuccessful" appears, and then click OK. On the Connection page, click Next.On the Folder page, select a folder, and then click Next.On the Web Console URL page, type the URL for the Orchestrator web console in the form of http://<computer>:port (the default port number is 82), and then click Next.On the Summary page, make sure that the settings are correct, and then click Create.On the Completion page, make sure that you receive the message "Orchestrator connector successfullycreated," and then click Close.To validate the creation of an Orchestrator connectorIn the Connectors pane, locate the Orchestrator connector that you created.Review the Status column for a status of Finished Success.NoteAllow sufficient time for the import process to finish if you are importing a large number of runbooks.In the Service Manager console, click Library.In the Library pane, expand Library, and then click Runbooks.Review the Runbooks pane, and note that your runbooks have been imported.http://technet.microsoft.com/en-us/library/hh519779.aspxThe Integration Pack for System Center Service Manager is an add-in for Opalis Integration Server 6.3 that enables you to use System Center Service Manager to coordinate and use operational data in an existing ITenvironment comprised of service desk systems, configuration management systems,, and eventmonitoring systems,, including specifically BMC Remedy IT Service Management Suite, BMC Atrium, andHP Service Manager 7 and HP Service Center 6.2.With this integration pack, you can also create workflows that interact with and transfer information to theintegration packs for System Center Operations Manager, System Center Data Protection Manager,System Center Configuration Manager, and System Center Virtual Machine Manager.
