The following has been configured: * NetScaler Gateways in both datacenters, each with a unique URL * NetScaler load balancing of StoreFront and Delivery Controller XML services * A separate XenApp and XenDesktop Site at each datacenter * Two StoreFront servers deployed in each datacenter aggregating resources from the Delivery Controllers in the respective datacenter During a disaster recovery strategy review, the IT infrastructure director recommends exploring cloud-based disaster recovery options for the XenApp and XenDesktop environment. The architect develops four different conceptual diagrams to display the current architecture as well as the potential cloud-based DR locations. Click the Exhibit button to view the conceptual diagrams. Based on the diagrams and above requirements, which Site architecture should the architect use? **A. Option 4 B. Option 2 C. Option 1 D.
