**F.** Complete the Pre-Survey Customer Questionnaire  
**G.** Schedule a meeting with the customer to discuss the Statement of Work  
**H.** Determine customer training requirements  
**Answer: D,E,F**

**NEW QUESTION: 2** Project Scenario  
Calendar Project (Note: The companies and people within the scenario are fictional.) There has been a reduction in the number of orders at the MNO Manufacturing Company due in part to the increased marketing activities of its competitors. To help counter this, the company has decided to create a promotional calendar for next year for all its current and prospective customers. The end product of this project will be a prepared calendar pack, ready for printing. The design of the calendar will be similar to one sent out previously, and must reflect the company image as described in the existing corporate branding standards. Another project is currently producing a new company logo when it is to be printed on each page of the promotional calendar. The prepared calendar pack will consist of:  
\* Design for each month - correctly showing public holidays and new company logo  
\* Selected photographs - 12 professionally-produced photographs, showing different members of staff  
\* Selected paper and selected envelope - for printing and mailing the calendar  
\* Chosen label design - a competition to design a label will be held as part of this project  
\* List of customers - names and addresses of customers to whom the calendar will be sent.  
The project is currently in initiation and will have two further stages:  
Stage 2 will include the following activities to:  
\* Create the customer list using information from the Accounts and Marketing departments  
\* Confirm compliance with the Data Protection Legislation  
\* Create a design for each month - this will be done by the internal creative team  
\* Select and appoint a professional photographer  
\* Gather photograph design ideas from previous project and agree photographic session schedule  
\* Prepare a production cost forecast  
\* Select paper and envelope.  
Stage 3 will include the following activities to:  
\* Produce and select professionally-taken photographs  
\* Hold the label design competition and choose the label design  
\* Assemble the prepared calendar pack.  
A production cost forecast, based on the options and costs for the paper, envelope, printing and marketing of the calendar is to be produced in stage 2. However, the actual production and distribution of the calendars is not within the scope of the project. The product cost forecast will be reviewed by the Project Board to determine whether the project should continue. It is now 05 October and the prepared calendar pack must be delivered to the print company by 30 November, to enable

printing and distribution of the calendar in time for Christmas. The cost of the activities to develop the specialist products and the cost of the project management activities are estimated to be £20,000. There is a project time tolerance of +1 week /-2 weeks and a project cost tolerance of +£6,000 / -£6,000. A change budget of £500 has been allocated but there is no risk budget. Whilst identifying the mailing costs for the calendars the Project Manager was surprised to find the costs could vary considerably depending on the size of the package and the delivery service used. For the purpose of this project, the Project Manager has selected an appropriate service but feels that a corporate standard for postage would have reduced the time and effort invested. It could reduce the company's overheads by up to £20k per year. How should the Project Manager record this observation within the project?**A.** Make an entry in the Lessons Log for future consideration by corporate management.**B.** Produce a project mandate, outlining the potential savings to be achieved by the introduction of a corporate standard.**C.** Record the observation in an Exception Report to the Project Board.**D.** Make a note of the observation in the Daily Log to be transferred to a Benefits Review Plan at the end of the project.**Answer: A**

**NEW QUESTION: 3** You create an SAP HANA extended application services, advanced model (XS advanced) multi-target application. What does the mta.yaml file contain?**A.** The Node.js package definition with dependencies and initial run configurations**B.** The application router description with the authentication methods and access routes**C.** The plugin name and version for every supported file suffix**D.** The application global elements, modules, resources, properties, and parameters**Answer: D**

**NEW QUESTION: 4** In welchen Prozessgruppen werden die Projektergebnisse überprüft und akzeptiert?**A.** Schließen**B.** Kontrollbereich**C.** Gültigkeitsbereich validieren**D.** Umfang planen**Answer: C**
