How it can be so precise, There are versions [Relevant P-C4H340-24 Questions](#) of Software and APP online, they can simulate the real exam environment.

NEW QUESTION: 1 Traceroute allows a route to be traced to a network using an Ethernet Routing Switch (ERS) 8600 CLI command. How could you use it to limit the number of hops the traceroute reports?**A.** Configure the -w (wait time per probe) to the number of maximum number of hops.**B.** Configure the -P (base UDP port) to the number of maximum number hops.**C.** Configure the -m (maximum TTL value) to the number of maximum number of hops.**D.** Configure the -q (number of probes per TTL) to the number maximum number of hops.**Answer: C**

NEW QUESTION: 2 CREATE OR REPLACE PROCEDURE add_dept(p_id NUMBER, p_name VARCHAR2) IS BEGIN INSERT INTO departments VALUES (<p_id, p_name, NULL, NULL); END; /**A.** Option B**B.** Option D**C.** Option A**D.** Option C**Answer: C,D**

NEW QUESTION: 3 Drag and drop the SNMP components from the left onto the descriptions on the right.**Answer:** Explanation:

NEW QUESTION: 4 You work as an Office Assistant for Tech Perfect Inc. You are working in a spreadsheet. You are facing a problem that when you type in a function and press Enter, the cell shows the function as you typed it, instead of returning the function's value as shown below: Which of the following is the reason that is causing the above problem?**A.** You are inserting a new column, next to a column that is already formatted as text.**B.** You are inserting a new column, next to a column containing Dates or Times.**C.** Excel is trying to reference an invalid cell.**D.** The lookup_value or the array you are searching resides in a cell containing unseen spaces at the start or end of that cell.**Answer: A****Explanation:** The Excel Won't Calculate My Function error occurs when a user types in a function and presses Enter, the cell shows the function as the user typed it, instead of returning the function's value. The reason that causes this problem is that the cells containing the formula are formatted as 'text' instead of the 'General' type. This happens when the user inserts a new column, next to a column that is already formatted as text due to which the new column inherits the formatting of the adjacent column. Answer option D is incorrect. The Failure to Look Up Values in Excel error occurs when a user gets an unexpected error while trying to look up or match a lookup_value within an array and Excel is not able to recognize the matching value. If the lookup_value or the array the user is searching resides in a cell, the user can have unseen spaces at the start or end of that cell. This will create the situation where the contents of the two cells that the user is comparing look the same but extra spaces in one of the cells cause the cells to have slightly different content.

The other reason is that the contents of the cells that are being compared may have different data types. Answer option B is incorrect. The Lookup Function Won't Copy Down to Other Rows error occurs when a user uses a function in one cell and it works perfectly but when he attempts to copy the function down to other rows, he gets the #REF error. The #REF! error arises when Excel tries to reference an invalid cell. This error occurs if the user has referenced an entire worksheet by clicking on the grey square at the top left of the worksheet. For Excel, this reference range is 1 to 1048576. Since the references are Relative References, Excel automatically increases the row references when this cell is copied down to other rows in the spreadsheet. Answer option C is incorrect. The Cell Shows a Date or Time Instead of a Number error occurs because the cell that contains the formula is formatted as a 'date' or 'time' instead of a 'General' type or a number. This situation arises because a user has inserted a new column, next to a column containing Dates or Times, the new column has 'inherited' the formatting of the adjacent column.
