If the user does not complete the mock test question in a specified time, the practice of all C-ARP2P-2404 valid practice questions previously done by the user will automatically uploaded to our database.

NEW QUESTION: 1 Most users of a pilot application have experienced more efficient processing compared to the old system. However, the business analyst (BA) has observed that a few people took much longer to complete the process. The system event log shows that those users encountered errors when they attempted to sign on. Which of the following would the BA recommend to improve overall performance?
A. Extend the pilot to more people
B. Send a reminder to all users of their user ID and password
C. Gather more information from the individuals who had errors
D. Automate the login process
Answer: C

NEW QUESTION: 2 You have a computer that runs Windows 10. You have an application control policy on the computer. You discover that the policy is not enforced on the computer. You open the Services snap-in as shown in the exhibit. (Click the Exhibit button.) You need to enforce the application control policy on the computer. What should you do?
A. Set the Application Information service Startup Type to Automatic and start the service.
B. Set the Application Management service Startup Type to Automatic and start the service.
C. Set the Application Experience service Startup Type to Automatic and start the service.
D. Set the Application Identity service Startup Type to Automatic and start the service.
Answer: D
Explanation: AppLocker, and its applications control policies, relies upon the Application Identity Service being active. Note: When you install Windows 7, the startup type of the Application Identity Service is set to Manual. When testing AppLocker, you should keep the startup type as Manual in case you configure rules incorrectly. In that event, you can just reboot the computer and the AppLocker rules will no longer be in effect. Only when you are sure that your policies are applied correctly should you set the startup type of the Application Identity Service to Automatic.

NEW QUESTION: 3 A security administrator discovers that an attack has been completed against a node on the corporate network. All available logs were collected and stored. You must review all network logs to discover the scope of the attack, check the box of the node(s) that

have been compromised and drag and drop the appropriate actions to complete the incident response on the network. The environment is a critical production environment; perform the LEAST disruptive actions on the network, while still performing the appropriate incident responses. Instructions: The web server, database server, IDS, and User PC are clickable. Check the box of the node(s) that have been compromised and drag and drop the appropriate actions to complete the incident response on the network. Not all actions may be used, and order is not important. If at any time you would like to bring back the initial state of the simulation, please select the Reset button. When you have completed the simulation, please select the Done button to submit. Once the simulation is submitted, please select the Next button to continue. **A.** See the solution below. Database server was attacked, actions should be to capture network traffic and Chain of Custody. IDS Server Log: Web Server Log: **B.** See the solution below. Database server was attacked, actions should be to capture network traffic and Chain of Custody. IDS Server Log: Web Server Log: Database Server Log: Users PC Log: **Answer: B**
