Even though, it doesn' t happen with [Marketing-Cloud-Account-Engagement-Specialist](#) the quality exam material that we facilitate our customers with.

NEW QUESTION: 1CORRECT TEXTWireless network users recently began experiencing speed and performance issues after access point 2 (AP2) was replaced due to faulty hardware. The original network was installed according to a consultant's specifications and has always worked without a problem.You, a network technician, have been tasked with evaluating the situation and resolving the issues to improve both performance and connectivity. Refer to the following diagram and perform any NECESSARY changes to the wireless and wired infrastructure by adjusting devices.Note: Adjust the LEAST number of devices needed to fix the issue, all blue icons in the image are clickable. When you feel the simulation is complete please select the Done button.**Answer:** Explanation:Here is the solution below.Explanation:Since we know that the network was running perfectly before replacing AP2 we should start by looking

at this new device that was used to replace the old one. Here we see that the other AP's have hard coded the speed and duplex settings to 100/full, while AP2 is set to auto/auto. Also, the other AP's have been configured to use 802.11G, while AP2 is using 802.11B. Finally the channel that AP2 is using overlaps with AP1 which can cause problems. Channels 1, 6, and 11 are spaced far enough apart that they don't overlap. On a non-MIMO setup (i.e. 802.11 a, b, or g) you should always try to use channel 1, 6, or 11. Since AP1 is using 1, and AP3 is using 11, AP2 should be using 6. NEW QUESTION: 2 A user has launched an EBS backed instance with EC2-Classic. The user stops and starts the instance. Which of the below mentioned statements is not true with respect to the stop/start action?
A. The Elastic IP remains associated with the instance
B. The instance gets new private and public IP addresses
C. The instance may run on a new host computer
D. The volume is preserved
Answer: A
Explanation: A user can always stop/start an EBS backed EC2 instance. When the user stops the instance, it first enters the stopping state, and then the stopped state. AWS does not charge the running cost but charges only for the EBS storage cost. If the instance is running in EC2-Classic, it receives a new private IP address; as the Elastic IP address (EIP) associated with the instance is no longer associated with that instance.

NEW QUESTION: 3 Your network contains two standalone servers named Server1 and Server2. Server1 has Microsoft SQL Server 2008 Reporting Services installed. Server2 has the SMTP Server feature installed. You configure the Reporting Services on Server1 to send reports by using Server2. You need to ensure that Server2 sends the reports. What should you do on Server2?
A. Configure TLS encryption
B. Configure a smart host
C. Modify the Connection control settings
D. Modify the Relay restrictions settings
Answer: D
Explanation: To change the SMTP Virtual Server Relay Restrictions, one needs to use the Internet Information Services (IIS) 6.0 Manager. This is an IIS Role Service that needs to be installed (IIS 6 Management Console)

NEW QUESTION: 4 プロジェクトと業務の共通点は何ですか？
A. システムによって実行されます
B. 反復性
C. 一意性
D. 限られたリソースによる制約
Answer: D
