NEW QUESTION: 1You are evaluating the implementation of an Edge Server. You need to identify which ports that must be open on the firewall to support the planned federation relationship.Which port should you open between the Internet and the planned Edge Server? To answer, configure the appropriate protocol and port in the answer area.Hot Area:**Answer:** Explanation:Explanation:<http://technet.microsoft.com/en-us/library/jj204756.aspx>Planned federation relationship in the case study - Partner company uses XMPP for IM - Answer is to use port TCP/5269 which is for XMPP federation

NEW QUESTION: 2You wanted to destroy some of the dependent resources from real infrastructure. You choose to delete those resources from your configuration file and run terraform plan and then apply. Which of the following way your resources would be destroyed?
A. Those would be destroyed in the order in which they were written in the configuration file previously before you have deleted them from configuration file.**B.** Terraform can still determine the correct order for destruction from the state even when you delete one or more items from the configuration.**C.** You can not destroy resources by deleting them from configuration file and running plan and apply.**D.** The resource will be destructed in random order as you have already deleted them from configuration.**Answer: B**Explanation:Terraform typically uses the configuration to determine dependency order. However, when you delete a resource from a Terraform configuration, Terraform must know how to delete that resource. Terraform can see that a mapping exists for a resource not in your configuration and plan to destroy. However, since the configuration no longer exists, the order cannot be determined from the configuration alone.To ensure correct operation, Terraform retains a copy of the most recent set of dependencies within the state. Now Terraform can still determine the correct

order for destruction from the state when you delete one or more items from the configuration.
