NEW QUESTION: 2A network administrator applies the following configuration to an IOS device.What is the process of password checks when a login attempt is made to the device?**A.** A local database is checked first. If that check fails, a TACACS+server is checked.**B.** A local database is checked first. If that fails, a TACACS+server is checked, if that check fails, a RADIUS server is checked.**C.** A TACACS+server is checked first. If that check fail, a database is checked?**D.** A TACACS+server is checked first. If that check fail, a RADIUS server is checked. If that check fail. a local database is checked.**Answer: A**Explanation:ExplanationThe "aaa authentication login default local group tacacs+" command is broken down as follows:+ The 'aaa authentication' part is simply saying we want to configure authentication settings.+ The 'login' is stating that we want to prompt for a username/password when a connection is made to the device.+ The 'default' means we want to apply for all login connections (such as tty, vty, console and aux). If we use this keyword, we don't need to configure anything else under tty, vty and aux lines. If we don't use this keyword then we have to specify which line(s) we want to apply the authentication feature.+ The 'local group tacacs+' means all users are authenticated using router's local database (the first method). If the credentials are not found on the local database, then the TACACS+ server is used (the second method).

NEW QUESTION: 3A client taking isotretinoin (Accutane) tells the nurse that she is pregnant. What should the nurse teach this client?**A.** Her pregnancy is threatened, and the fetus is at risk for teratogenesis.**B.** Accutane is a Category D drug, which means it is unsafe in pregnancy.**C.** She has a reportable condition, and the pregnancy must be terminated.**D.** Her pregnancy must be followed carefully by a genetic specialist.**Answer: A**Explanation:Explanation/Reference: Explanation:Accutane is a Category X drug, which means pregnancy is contraindicated due to teratogenesis associated with the medication. The pharmaceutical manufacturer should be notified of any pregnancy occurring while taking the drug, but reporting is voluntary. Choosing to terminate the pregnancy is a personal decision that requires full information. Consultation with a genetic specialist or OB physician is indicated. Safety and Infection Control
