If the server is running an evaluation version of Windows Server 2012 R2 Standard or Windows Server 2012 R2 Datacenter, you can convert it to a retail version as follows: If the server is a domain controller, you cannot convert it to a retail version. In this case, install an additional domain controller on a server that runs a retail version and remove AD DS from the domain controller that runs on the evaluation version. From an elevated command prompt, determine the current edition name with the command DISM /online /Get-CurrentEdition. Make note of the edition ID, an abbreviated form of the edition name.
