NEW QUESTION: 1 You are developing an ASP.NET Core web application by using an Entity Framework code-first approach. The application uses a SQLite database. You make changes to the classes in the model. You must apply the changes to the database. You need to suggest an approach to reliably handle the Entity Framework migrations. Which three actions should you perform? Each correct answer presents a part of the solution. NOTE: Each correct selection is worth one point. **A.** Modify the scaffolded migration script to drop the modified tables. **B.** Modify the scaffolded migration script to drop the existing database and create the new database. **C.** Modify the scaffolded migration script to create new tables with the migration changes. **D.** Run the following command: `dotnet ef migrations add` **E.** Run the following command: `dotnet ef database update`
Answer: B,C,D
Explanation: **E:** Run `dotnet ef migrations add InitialCreate` to scaffold a migration and create the initial set of tables for the model. **C:** You can work around some of the SQLite limitations by manually writing code in your migrations to perform a table rebuild. A table rebuild involves renaming the existing table, creating a new table, copying data to the new table, and dropping the old table. **D:** SQLite does not support all migrations (schema changes) due to limitations in SQLite. For new development, consider dropping the database and creating a new one rather than using migrations when your model changes. **References:** <https://docs.microsoft.com/en-us/ef/core/get-started/netcore/new-db-sqlite>
<https://docs.microsoft.com/en-us/ef/core/providers/sqlite/limitations>

NEW QUESTION: 2

セキュリティ管理者は、データセンターにある企業のスマートフォンとターミナルサーバーに強力なセキュリティを実装したいと考えています。該当するコントロールを各アセットタイプにドラッグアンドドロップしますか？

手順：コントロールは複数回使用でき、すべてのプレースホルダーを埋める必要はありません。シミュレーションが完了したら、[完了]ボタンを選択して送信してください。
Answer: Explanation:
Explanation

NEW QUESTION: 3 Which of the following statements are correct regarding FortiGate virtual domains (VDOMs)? (Choose two) **A.** VDOMs divide a single FortiGate unit into two or more independent firewall. **B.** Administrative users with a 'super_admin' profile can administrate only one VDOM. **C.** Each VDOM can run different firmware versions. **D.** A management VDOM handles SNMP, logging, alert email and FortiGuard updates. **Answer: A,D**
