NEW QUESTION: 1 You are working as a solution architect for an online retail store to create a portal to allow the users to pay for their groceries using credit cards. Since the application is not fully compliant with the Payment Card Industry Data Security Standard (PCI DSS), your company is looking to use a third party payment service to process credit card payments. The third party service allows a maximum of 5 public IP addresses at a time. However, your website is using Oracle Cloud Infrastructure (OCI) Instance Pool Auto Scaling policy to create up to 15 instances during peak traffic demand, which are launched in VCN private subnets and attached to an OCI public Load Balancer. Upon user payment, the portal connects to the payment service over the Internet to complete the transaction. What solution can you implement to make sure that all compute instances can connect to the third party system to process the payments at peak traffic demand? **A.** Route payment request from the compute instances through the OCI Load Balancer, which will then be routed to the third party service. **B.** Route credit card payment request from the compute instances through the NAT Gateway. On the third-party services, whitelist the public IP associated with the NAT Gateway. **C.** Whitelist the Internet Gateway Public IP on the third party service and route all payment requests through the Internet Gateway. **D.** Create an OCI Command Line Interface (CLI) script to automatically reserve public IP address for the compute instances. On the third services, whitelist the Reserved public IP. **Answer: C**
