NEW QUESTION: 3SIMULATIONClick to expand each objective. To connect to the Azure portal, type <https://portal.azure.com> in the browser address bar.When you are finished performing all the tasks, click the 'Next' button.Note that you cannot return to the lab once you click the 'Next' button. Scoring occur in the background while you complete the rest of the exam.OverviewThe following section of the exam is a lab. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.To start the labYou may start the lab by clicking the Next button.Your company plans to store several documents on a public website.You need to create a container named bios that will host the documents in the storagelod8322489 storage account. NEW QUESTION: 4A circuit level gateway is _____ when compared to an application level firewall. **A.** More secure. **B.** Slower. **C.** Easier to maintain. **D.** More difficult to maintain. **Answer: C**
Explanation: Since circuit level gateways are not as high in the OSI model for the inspection as Application level firewalls, they are easier to maintain and configure. Application layer firewalls are up to layer 7 of the OSI model and provide a great bunch of options and complex configurations. Application layer firewalls are more secure than circuit level gateway because they can track and analyze information up to layer 7, a drawback to this, is that this functionality makes them slower.
