NEW QUESTION: 2 You need to ensure that the self-service users and the administrators can deploy virtual machines. The solution must meet the technical requirements. What should you create?**A.** One host profile**B.** One virtual machine template**C.** Two VMM library shares**D.** Two application profiles**Answer: B****Explanation:** Explanation/Reference: Explanation: One virtual machine template would be enough. So I would think it is answer D The way I understand the TechNet article, libraries and shares are used to maintain file-based items like VHDs, scripts and ISOs. A second library or another share would not change the way how a VM can be created (dynamic memory or not) just from which place it will use the "ingredients"
