**NEW QUESTION: 1** A company is migrating a three-tier application to AWS. The application requires a MySQL database. In the past, the application users reported poor application performance when creating new entries. These performance issues were caused by users generating different real-time reports from the application during working hours. Which solution will improve the performance of the application when it is moved to AWS? **A.** Create an Amazon Aurora MySQL Multi-AZ DB cluster with multiple read replicas. Configure the application reader endpoint for reports. **B.** Import the data into an Amazon DynamoDB table with provisioned capacity. Refactor the application to use DynamoDB for reports. **C.** Create an Amazon Aurora MySQL Multi-AZ DB cluster. Configure the application to use the backup instance of the cluster as an endpoint for the reports. **D.** Create the database on a compute optimized Amazon EC2 instance. Ensure compute resources exceed the on-premises database. **Answer: A**

**NEW QUESTION: 2** You have activated several currencies so that users in different countries can view revenue data in reports in their local currency. However, you received a complaint from a sales manager that she sees incorrect revenue numbers in her team reports now that she has switched to a different currency. What is the likely problem? **A.** All of the manager's team members must use the same currency for her reports to roll-up correctly. **B.** Reports can only display data in the company default currency. **C.** The manager does not have the role-based can read all records check box selected in her user profile. **D.** you did not set up exchange rates for the newly activated currencies. **Answer: D** Explanation: Explanation/Reference: Explanation: The Currency setting provides the default currency amount linked with all new records the user creates. When a user views revenue reports, they display in the user's default currency. If a manager sees cumulative revenue from users with different currencies, she sees the amount in her default currency (company administrators must set up exchange rates for this to occur).
