NEW QUESTION: 1Which of the following requires an expenditure of the resources when working within an arrow diagramming method?**A.** Histograms**B.** Milestone events**C.** Path activities**D.** Pareto diagram**E.** Accounting support costs**Answer: C**

NEW QUESTION: 2Which two options are ways that a service provider should use analytics to monetize their Cisco Service Provider Wi-Fi networks? (Choose two.)**A.** providing Over-The-Top Internet services**B.** gathering and analyzing information about subscriber behavior and selling that information to businesses**C.** selling location-based advertising**D.** offering a usage-based Internet subscription service**Answer: B,C**

NEW QUESTION: 3**A.** Option C**B.** Option D**C.** Option B**D.** Option A**Answer: D****Explanation:** ExplanationJumbo frames allow more than 1500 bytes of data by increasing the payload size per packet, and thus increasing the percentage of the packet that is not packet overhead. Fewer packets are needed to send the same amount of usable data. However, outside of a given AWS region (CC2-Classic), a single VPC, or a VPC peering connection, you will experience a maximum path of 1500 MTU. VPN connections and traffic sent over an Internet gateway are limited to 1500 MTU. If packets are over1500 bytes, they are fragmented, or they are dropped if the Don't Fragment flag is set in the IP header.For more information on Jumbo Frames, please visit the below URL:*

http://docs.aws.amazon.com/AWSCC2/latest/UserGuide/network_mtu.htm#jumbo_frame_instances
