**NEW QUESTION: 4** Jasmine creates a presentation. She wants to start another presentation

after completing the current presentation during the slide show. Which of the following will she use to accomplish the task?**A. Hyperlink****B. Action Buttons****C. Reuse Slides****D. SmartArt****Answer: A**  
Explanation:Hyperlinking is a process to introduce a dynamic textual environment by attaching links to the Uniform Resource Locator (URL). It is used to link various elements of a slide to another slide. It can also be used to interconnect excel sheets, word document, or any other presentation. A user can create a hyperlink to the following:A slide in the same presentation.A slide in a different presentation.An e-mail address.A page or file on the Web.A new file.**Answer option B is incorrect.** The Reuse Slides feature is used when a user selects a slide from a presentation and reuses it into another presentation.**Answer option D is incorrect.** SmartArt is a visual graphic used to represent the information effectively and efficiently. It is used to create designer-quality illustrations. A user can increase the emphasis of information by adding SmartArt. Though a SmartArt graphics audience of a presentation can understand and recall information better than a text, it is necessary to visualize what type and layout are best for displaying data, and what a user wants to convey with a SmartArt graphic. A user can quickly convert slide text to a SmartArt graphic. In addition, a user can add animation to a SmartArt graphic in Office PowerPoint 2010 presentations.**Answer option C is incorrect.** The action buttons are the predefined buttons that are used to traverse quickly and efficiently in a presentation. They are used for defining hyperlinked objects. The hyperlinked objects can be a Web page, a file, or a network location. The action buttons are mostly used for self-executing presentations.**Chapter: PRESENTATION, ADVANCED - LEVEL****Objective: Multimedia**
