The passing rate of our C\_THR84\_2311 study materials is the issue the client mostly care about and we can promise to the client that the passing rate of our product is 99% and the hit rate is also high.

**NEW QUESTION: 1**Which three statements are true about the transparent firewall mode in Cisco ASA?(Choose three.)**A.** SSL VPN is supported for management.**B.** Static routes are supported.**C.** The firewall can connect to the same Layer 3 network on its inside and outside interfaces.**D.** Only one global address per device is supported for management.**E.** PAT and NAT are not supported.**F.** The firewall is not a routed hop.**Answer: B,C,F**Explanation: The adaptive security appliance connects the same network on its inside and outside interfaces. Because the firewall is not a routed hop, you can easily introduce a transparent firewall into an existing network. IPv4 and IPv6 traffic is allowed through the transparent firewall automatically from a higher security interface to a lower security interface, without an access list. ARPs are allowed through the transparent firewall in both directions without an access list. You can add static routes on the ASA when it is running on transparent mode.Reference:
