NEW QUESTION: 3 In performing a risk assessment on the impact of losing a server, the value of the server should be calculated using the:
A. cost to obtain a replacement.
B. original cost to acquire.
C. annualized loss expectancy (ALE).
D. cost of the software stored.
Answer: A
Explanation: Explanation The value of the server should be based on its cost of replacement. The original cost may be significantly different from the current cost and, therefore, not as relevant. The value of the software is not at issue because it can be restored from backup media. The ALE for all risks related to the server does not represent the server's value.
