NEW QUESTION: 1 Topic 7, Trey ResearchServer ConfigurationsThe SharePoint Server 2007 environment includes the servers configured as shown in the following table.The current environment does not use Excel Services, InfoPath Forms Services, or the Business Data Catalog.The SharePoint sites are accessed via a hardware load balancer.Business Continuity RequirementsBusiness critical SharePoint lists must be backed up and restored independently of other SharePoint content. Restored lists must retain their list views and alerts.SharePoint patches and service packs must be tested before they are deployed to the production environment.Departmental RequirementsTrey Research has the following departmental requirements for the planned SharePoint Server 2010 deployment:-Human resources department documents must only be accessible to users in the human resources department. -Accounting department documents must only be accessible to users in the accounting department.-Users in each department must be able to create and use their own search scopes. -Users in each department must be able to manage their own search keywords.User RequirementsTrey Research uses a custom content type for its research department documents. Research department documents must be created across multiple site collections. You must be able to use the same content type across multiple site collections.You must use the minimum amount of administrative effort to move content to the SharePoint Server 2010 environment.Users must be able to search all of the SharePoint content from a single Web Part. Searches must include results from Bing.com.You are a SharePoint administrator for Trey Research.You plan to upgrade the existing Microsoft Office SharePoint Server 2007 environment to SharePoint Server 2010. You need to recommend a solution that meets the requirements of the human resources department andthe accounting department. Your

solution must minimize costs. What should you recommend?**A.** one server farm and two site collections**B.** two server farms and one site collection in each server farm**C.** one server farm, one site collection, and two subsites**D.** one server farm, one site collection, and two document libraries**Answer: A**Explanation:Section: Case 7

NEW QUESTION: 2 Are animations enabled by default in Tableau?**A.** No**B.** Yes**Answer: A**
Explanation:ExplanationNo, by default, animations are not enabled in Tableau.We can animate visualizations to better highlight changing patterns in your data, reveal spikes and outliers, and see how data points cluster and separate.Animations visually transition between filter, sort, and zoom settings, different pages, and changes to filter, parameter, and set actions. As visualizations animate in response to these changes, viewers can more clearly see how data differs, helping them make better informed decisions.When you author animations, you can choose between two different styles: simultaneous or sequential. Here are examples of each type.1) Simultaneous animationsThe default simultaneous animations are faster and work well when showing value changes in simpler charts and dashboards.2) Sequential animations Sequential animations take more time but make complex changes clearer by presenting them step-by-step.To Animate visualizations in a workbook:1) Choose Format > Animations.2) If you want to animate every sheet, under Workbook Default, click On. Then do the following:For Duration, choose a preset, or specify a custom duration of up to 10 seconds.For Style, choose Simultaneous to play all animations at once or Sequential to fade out marks, move and sort them, and then fade them in.3) To override workbook defaults for a particular sheet, change the settings under Selected Sheet.

NEW QUESTION: 3 Examine this code:You execute the CREATE PROCEDURE statement above and notice that it fails. What are two reasons why it fails? (Choose two.)**A.** The formal parameter p_bonus_value is declared but is not used anywhere.**B.** You cannot update a table using a stored procedure.**C.** The declaration of the formal parameter p_cutoff cannot have a DEFAULT clause.**D.** The syntax of the UPDATE statement is incorrect.**E.** The declaration of the formal parameter p_bonus_percent cannot have a DEFAULT clause.**F.** The declaration of the formal parameter p_margin cannot have a DEFAULT clause.**Answer: E,F**

NEW QUESTION: 4 Your multitenant container database (CDB) is running in archivelog mode. Fxamlne this command and its output:You issue this command in RMAN:RMAN>BACKUP PLUGGABLE DATABASE "CDBSROOT", pdb2_l;What is the outcome?**A.** The backup succeeds and all the data files belonging to both the root container and pdb2_i are backed up.**B.** The backup succeeds, but only the system and sysaux tablespaces in the root container are backed up along with all the data files in pdb2_i.**C.** The backup falls because the root container cannot be backed up with pdb2_i.**D.** The backup fails because pdb2_1 should be placed in the mount stage.**Answer: D**
