Dear, please prepare well with **Composite Test NS0-304 Price** our Hybrid Cloud - Administrator Exam dumps pdf, and you will pass at first attempt.

NEW QUESTION: 1Your database has a strict security requirement that whenever users select from any table in the database schema, they must append the select statement with an additional where predicate that returns only records WHERE owner = :pUserName. This restricts users to seeing only records that they own. When you design and develop the ADF Business Components in your ADF application, there will be more than 100 view objects that select against this database. You want to build a solution that not only ensures all your developers, when writing view objects, meet the database's strict security requirement, but takes the least amount of development effort for your entire team and is easy to maintain in the long term. Identify the correct solution. (Choose the best answer.) **A.** Override each view object's ViewObjectImpl class methods to programmatically modify each view object's where clause at run time to add the predicate to the select clause regardless of the query executed. **B.** In each view object, simply type the predicate into the WHERE clause of the View Object Editor query page. **C.** Define a view criteria on each view object at design time to apply the predicate to the corresponding view object, ensuring the view criteria is defined against the view object instance in the Application Module Editor. **D.** Create a complete set of custom ADF Business Component framework classes for your business components and then override your custom ViewObjectImpl class to programmatically modify each view object's where clause at run time to append the predicate. **Answer: D**

NEW QUESTION: 2A customer has existing fiber attached storage that has reached the end of life. The customer wants a scalable solution that is easy to manage and integrates with VMware. The customer has a preference for an XIV based solution, but is concerned about migrating the existing data and boot volumes. Which explanation best addresses the customer's concern? **A.** XIV has both a vCenter and VAAI plug in. **B.** An IBM Spectrum Control must be included so that the existing storage can be virtualized and moved to the XIV. **C.** XIV has a built in capability to copy the existing data. **D.** Thin provisioning on the XIV will reduce the necessary capacity of the XIV. **Answer: B** Explanation: Reference: <http://searchstorage.techtarget.com/news/2240240643/IBM-rebrands-storage-as-IBM-Spectru>
